## Annex — Netherlands

### 19. Statistics on police recorded crime: homicide and other crimes leading to the death of another person, by category - Metadata

| | |
|---|---|
| Comments for Table 19 | Both Murder and Manslaughter are "intentional, deliberate and unlawful killing". The differerence between murder (moord) and manslaughter (doodslag) is that murder is premeditated, manslaughter is not. Abortion and Euthanasia are considered crimes. But under special circumstances (done by a physician acting within strict guidelines) it is not punishable. Causing death by dangerous or drunk driving could be homicide (intentional or non-intentional) or a traffic offence. It depends on how the prosecutor qualifies the case. |
