Joint Eurostat-UNODC data collection: Implementing revised CTS

EUROSTAT

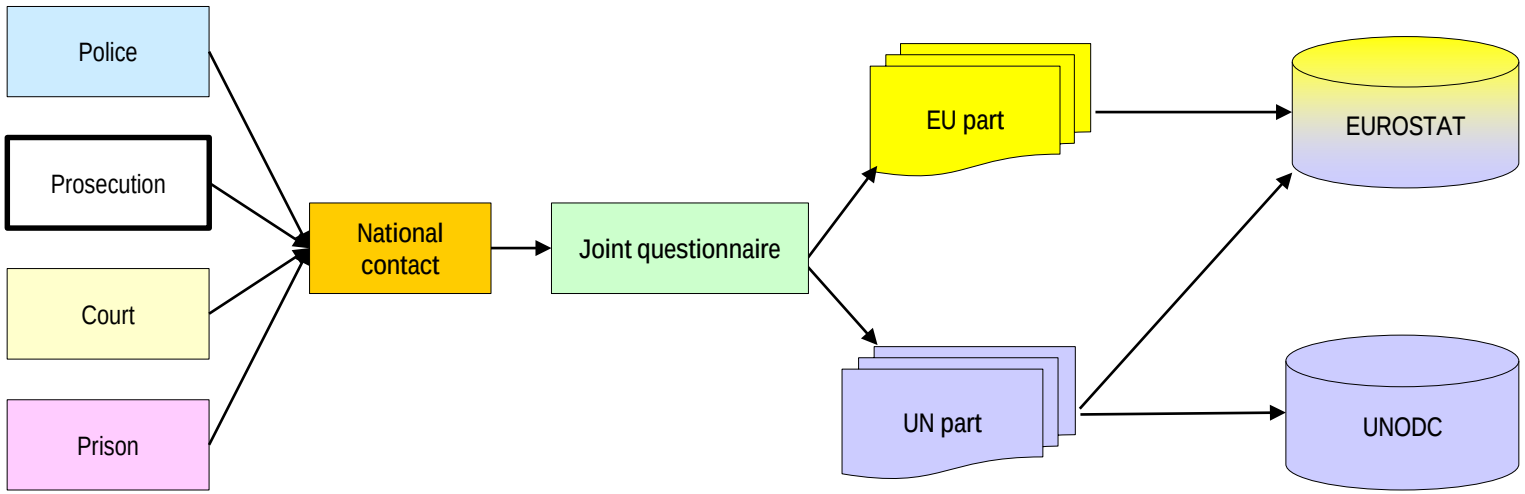
Didier DUPRE

Joint second meeting UN-CTS Focal Points and ICCS Technical Advisory Group – Lima – 7-8 June 2018

Eurostat and EU crime statistics

- Eurostat processes and publishes comparable statistical information at European level collected by the European Statistical System at national level: European Statistics
- Co-ordinates statistical activities at Union level and more particularly inside the European Commission: Other statistics; for crime DG HOME and DG JUST
- First Eurostat data collection on crime and criminal justice for reference year 2005 across EU Member States and some neighbour countries; current series from 2008 reference year
- Since 2014, the figures on crime and criminal justice are collected through a joint Eurostat-UNODC data collection across EU Member States and some neighbour countries

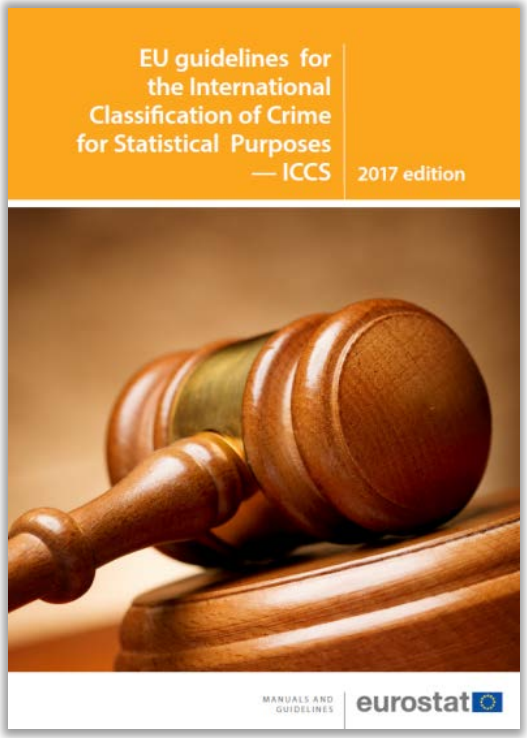
Regular European crime statistics

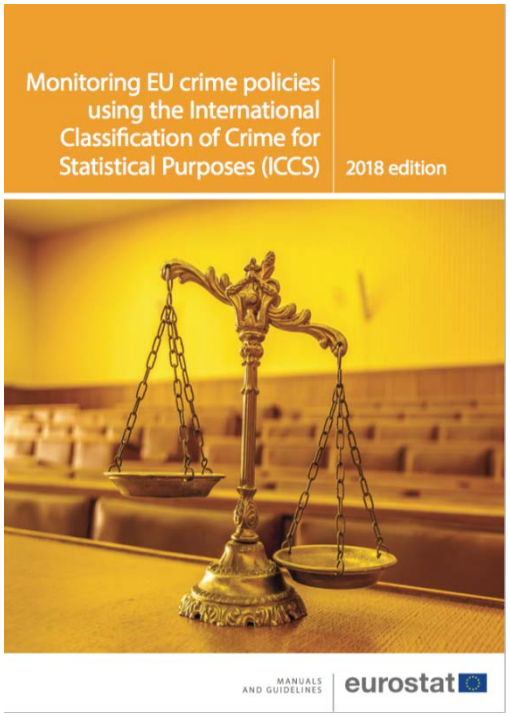


- EU part: specific needs for EU-law, e.g. more details
- Additional collections (non "regular") for specific cases, e.g. legal definition of an offence (migrants smuggling, etc.)

European crime statistics - ICCS

- ICCS implemented in the joint Eurostat-UNODC data collection since 2016 reference year (to be published soon)
- Eurostat provides guidelines, link to EU polices and **financing**





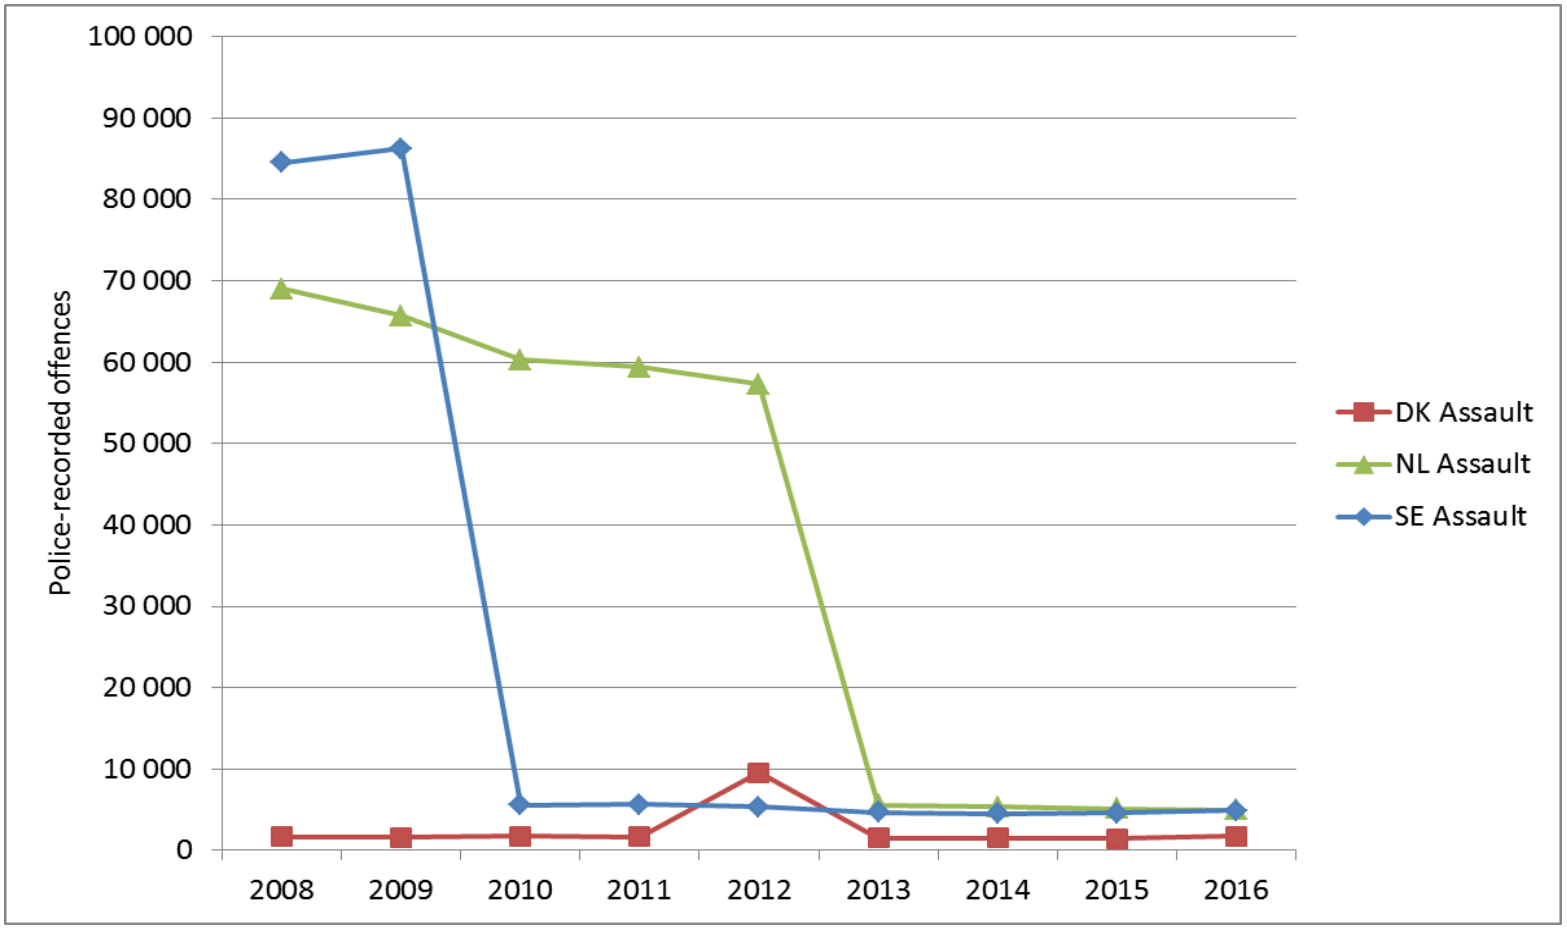
European crime statistics – revised CTS

- Some data needed for EU laws are not available anymore, hence included in Eurostat additional part
- The same due to the every 2-year rotation, the year when data needed for EU laws are not collected in the UN part they should be included in Eurostat additional part
- Consequence 1: more important Eurostat additional part
- Consequence 2: delays in delivery of 2016 data (1st year)
- Consequence 3: missing 2016 data for some Member States (1st year) that will be provided together with the 2017 reference year data
- Metadata: very good improvement

European crime statistics – ICCS

- Revisions: -> breaks / large changes in series but this is an improvement for better comparability; Over 32 countries that sent 2016 data:
  - ✓ 11 have sent full revised time series back to 2008
  - ✓ Others sent partial back series starting only from 2013
  - ✓ Covering some of the 13 core offences, in particular Theft of a motorised vehicle, Theft, Burglary, Attempted intentional homicide and/or Homicide, Serious assault and/or Sexual assault and Sexual violence

ICCS – break in times series: Assault



Other EU crime statistics

- DG HOME: 2017 special data collection on trafficking of human beings; implemented with the Anti-trafficking Coordination network while working together with Eurostat on checking and analysing data
- DG JUST: 2018 EU Justice Scoreboard together with the Council of Europe Commission for the Evaluation of the Efficiency of Justice (CEPEJ, non EU body)
- European Multidisciplinary Platform against Criminal Threats (EMPACT): work for setting up a permanent data collection system of seized, found or returned firearms; currently pilot phase is taking place (2018, 2019).
