Global eLearning team presents the Programme during CCPCJ 2017

May 25, 2017

VIENNA - The UNODC’s Global Programme Against Money Laundering, Global Programme against Cybercrime, Global eLearning Programme and CRIMJUST were brought together to share their expertise and knowledge on cryptocurrencies during the 26th Commission on Crime Prevention and Criminal Justice.

The joint concern of the rising risk of and the threat posed by the use of technology by organized criminal networks, and, more specifically, the use of cryptocurrencies, brought together over 100 participants that joined the side-event titled ‘Investigation of Money-Laundering and Terrorist Financing with Cryptocurrencies- Can we track criminal cryptocurrencies? Yes, we can!’.

In collaboration with the Global Programme Against Money Laundering, the Global eLearning Programme presented the courses on Anti-Money Laundering. During this side-event, Mr. Nicolas Caruso, the Production Associate of the Global eLearning team, also spoke about the collaboration between the Global eLearning Programme and Member States and gave a talk on the sustainable development of the Programme.

From left to right Mr. MARCE TEIXEIRA, Mr. Oleksiy FESHCHENKO, Mr. John BRANDOLINO, Mr. Neil WALSH, Mr. Nicolas CARUSO

“The course on Anti-Money Laundering is a good basis for further study on the subject. Qualified anti-money laundering professionals are in demand as organisations increase their focus on risk prevention,” he said.

The side-event led to a useful exchange of ideas, information about programmes and evaluation of successful strategies, leading to a better coordination between programmes in order to ensure a holistic approach to combat the threats posed by cryptocurrencies.

EXPERT'S CORNER

Q&A with Christian Koenig, Global eLearning expert

What do you do for the Global eLearning Programme?

I am responsible for the localization of modules.

What is one of the most common challenges that you have encountered in eLearning?

One challenge is that the areas where we want to reach do not have internet access. For that reason we offer MTUs.

What is an MTU?

It is known as the Mobile Training Unit. It consists of 1 WiFi router, 1 server, 10 to 25 laptops (with built-in eLearning content), which are designed to withstand rough environmental conditions. We deliver these MTUs in offline and online mode.

Here, we adapt our eLearning content to suit the local conditions, like the language, of our audience.
CAMBODIA IMPROVES BORDER SECURITY THROUGH ELEARNING TRAINING FOR CUSTOMS OFFICERS

June 15, 2017
PHNOM PENH - To strengthen Cambodia’s capacity to counter transnational trafficking, on 15th of June a training course on Container Inspection at Seaports was conducted by UNODC for 20 Customs officers in Phnom Penh City.

With over 500 million sea containers transported across the globe every year, law enforcement officers must be always watchful to detect, check, prevent and combat the illicit trafficking of weapons, drugs, precursor chemicals, wildlife and other items that could either be utilised for terrorist activity or benefit transnational organised criminal groups.

Cambodia is a country of import, export and transit of various illicit trade items and a country at risk from transnational organised threats such as heroin, opium, synthetic drugs, precursors, illegal wildlife and timber, weapons, counterfeit goods and falsified medicines.

The modules, provided by the Global eLearning Programme, show the concepts and techniques of how to thoroughly search a container. They cover the different areas of a container and where spaces are or can be created and how to search these areas in a systematic way.

This training helped the participants understand the basic and modern techniques used in the preliminary assessment of cargo in order to identify shipments of cargo that may be carrying illegal drugs. The Global eLearning Programme received positive and valuable feedback.

Pakistan enhances law enforcement capacity through eLearning

May 10, 2017
MULTAN - United Nations Office on Drugs and Crime (UNODC) Country Office in Pakistan has introduced an eLearning programme to strengthen law enforcement agencies for the elimination of crimes in Pakistan. UNODC Representative Cesar Guedes visited the newly established eLearning centre at Police Lines in Multan.

“UNODC is currently transforming the training platform from computer-based to full-scale eLearning so it could be made available in online format with additional features and benefits,” Guedes emphasised.

The UNODC representative maintained, “Within the framework of UNODC Pakistan Programme, eLearning has been identified as a priority assistance towards building the law enforcement capacity so it can meet security challenges, as well as community expectations.”
New introductory module about the Global eLearning Programme will be available soon

June 30, 2017
VIENNA - By the end of August, the Global eLearning Programme is planning to deliver an introductory module about the Programme itself, that will introduce you to the following topics:

- The main reasons for developing eLearning;
- Introduction to the Global eLearning Platform;
- The basic types of eLearning courses and their components;
- Examples of eLearning courses developed by UNODC Global eLearning Programme.

It will be publicly available in English and will consist of interactive tests including images, animations and interactions. This will help our users to better understand the benefits of elearning and easily navigate through the eLearning Platform. You will also find the answers to frequently asked questions in a form of interactive module.

25 courses, provided by the Global eLearning Programme, cover security and human threats such as transnational organized crime, illicit drugs, trafficking in persons and smuggling of migrants, and issues relating to border control, forensics and laboratories, controlled deliveries, security and travel documents, intelligence, HIV and AIDS and human rights.

ORGANIZATIONAL ANNOUNCEMENTS

We welcome our new Global eLearning Programme Coordinator!

We welcome Ms. Sarah Donnelly as the new Global eLearning Programme Coordinator, who started on July 10th. Before arriving to the UNODC in Vienna, Sarah was the Programme Coordinator and Forensic Expert in the Programme Office in the State of Palestine.

Ms. Donnelly will be responsible for the coordination of technical elements of the Global eLearning Programme portfolio, as well as fundraising and advising relevant stakeholders, other UNODC Field Representatives and eLearning Focal Points on strategic and operational direction and development with regard to eLearning.
