UNODC Global eLearning Programme in numbers

- 36,134 Registered Users
- 30 Courses Available
- 17 Languages Available
- 350 Training Modules
- 319,288 Hours of eLearning Training Delivered
- 197 Countries Connected to the Programme
- 14 Mobile Training Units
- 8 eLearning Centres
- 616 Social Media Communications (Twitter/Facebook)
eLEARNING AFRICA CONFERENCE 2017

The UNODC Global eLearning Programme participated in the “eLearning Africa Conference 2017”, which is the largest gathering of eLearning and ICT supported education and training professionals in Africa. The conference took place in Balaclava, Mauritius from the 27th to 29th of September 2017. UNODC was represented by Mr. Kamal Toure, National Project Officer (E-learning) based in Dakar, Senegal.

Many workshops and plenary events were held during the three-day conference. This was an opportunity for the Project Officer to network and build stronger partnership with actors and counterparts from all over Africa and introduce them to UNODC’s latest developments in eLearning. A demonstration of the new UNODC eLearning platform was provided to many participants. As a result, some national training institutions and agencies have expressed an interest in acquiring UNODC’s eLearning services.

EXPERT’S CORNER:
SHORT QA WITH NICOLAS CARUSO,
eLEARNING PRODUCTION FOCAL POINT

What do you do for the Global eLearning Programme?
I am in charge of the production process of the modules. I coordinate the process with the IT team that are responsible for the technical side of production and subject matter experts who are responsible for the substantive content.

What is the most important part of the production process?
Every single aspect of the production process is important. However, I pay particular attention to the quality assurance (QA) phase. An effective QA programme is often the difference between a high-end and a low-end training course. All of our modules undergo a process of rigorous quality assurance, ensuring that United Nations and international standards and best practices have been adhered to.

What are the UNODC Global eLearning Programme goals for the future?
At the strategic level, our goal is to create stronger relationships at the inter-regional and inter-agency level, thereby promoting our programme and leveraging available resources in training and capacity building to provide the best service to our clients and users. At the technical level, the goal of the programme is to move, in the next few years, towards mLearning (Mobile learning) and virtual reality learning, as well as continue to provide high quality eLearning courses.
TRAINING IN LIBERIA

LIBERIA – An offline training course for 80 National Liberian Officers was held in September 2017 at the Liberia National Police Training Academy (LNPTA) using the “Mobile Training Units” provided by the Global eLearning Programme. The specialised training was organised to strengthen Liberia’s national capacity to counter drug trafficking, smuggling of migrants, among other issues that currently affect the country. Due to the success of this training, additional training training is already planned for the Liberia National Police and other national security agencies.

UNODC GLOBAL eLEARNING PROGRAMME & AGENDA 2030 FOR SUSTAINABLE DEVELOPMENT

UNODC’s Global eLearning Programme supports the implementation of Agenda 2030 for Sustainable Development, “a plan of action for people, planet and prosperity”, with over 400 modules integrated into eLearning courses on a diverse range of human security and health challenges such as wildlife crime, human trafficking, gender-based violence and other, criminal investigations, as well as promoting justice, human rights and international cooperation. Our training courses are designed by UNODC subject matter experts to address these challenges and are being delivered online and offline across the world in line with United Nations standards and norms and other relevant international instruments.

The eLearning Programme contributes especially to the achievement of Sustainable Development Goals 5 (Good Health and Well-Being), 8 (Decent Work and Economic Growth), 10 (Reduced Inequalities), 16 (Peace, Justice and Strong Institutions) and 17 (Partnerships).

Investment in e-Learning is cost-effective and contributes to sustainable knowledge transfer as part of a blended learning approach. Incorporation of eLearning into projects and programmes helps to ensure standardisation of UNODC training, including mainstreaming of human rights and gender into all courses.
