Selected Articles on the Analysis of Drugs of Abuse in Seized Materials
(Jan-June 2018)

Another chemically masked drug: p-tosyl methylamphetamine, M. Collins, A. Bhattarai and H. Salouros, *Drug Testing and Analysis*, **2018**, 10, 898-905. https://doi.org/10.1002/dta.2363

Comparison and evaluation of the quick purification methods of methamphetamine hydrochloride from dimethyl sulfone for spectroscopic identification, H. Segawa, K. Kumisaka, R. Sugita, Y. T. Iwata, T. Yamamuro, K. Kuwayama, K. Tsujikawa, T. Kanamori and H. Inoue, *Forensic Science International*, **2018**, 282, 86-91.
http://www.sciencedirect.com/science/article/pii/S0379073817304747

Considerations regarding the validation of chromatographic mass spectrometric methods for the quantification of endogenous substances in forensics, C. Hess, K. Sydow, T. Kueting, M. Kraemer and A. Maas, *Forensic Science International*, **2018**, 283, 150-155.
http://www.sciencedirect.com/science/article/pii/S0379073817305352

Genuine sildenafil tablets sold in Brazil disguised as MDMA, J. Coelho Neto, R. F. P. Faraco, C. F. Alves, S. M. M. Castro and Y. Machado, *Forensic Science International*, **2018**, 283, e8-e12.
http://www.sciencedirect.com/science/article/pii/S0379073817305133

Heroin in Malaysia and Singapore, M. Sulaiman, V. Kunalan, T. W. Yap Angeline, J. L. Lim Wendy, Y. Ng Joey Joo, X. Loh Samuel Wei and K. B. Chan, *Drug Testing and Analysis*, **2017**, 10, 109-119.
https://doi.org/10.1002/dta.2238

Identification of specific markers for amphetamine synthesised from the pre-precursor APAAN following the Leuckart route and retrospective search for APAAN markers in profiling databases from Germany and the Netherlands, M. Hauser Frank, T. Rößler, W. Hulshof Janneke, D. Weigel, R. Zimmermann and M. Pütz, *Drug Testing and Analysis*, **2017**, 10, 671-680.
https://doi.org/10.1002/dta.2296

Letter to the Editor—Elbow Grease and OxiClean™ for Cleaning Fentanyl- and Acetylfentanyl-contaminated Surfaces, F. N. M., S. J. E. and W. T. J., *Journal of Forensic Sciences*, **2018**, 63, 336-338. https://onlinelibrary.wiley.com/doi/abs/10.1111/1556-4029.13675

Practical tool for sampling and fast analysis of large cocaine seizures, J. Eliaerts, N. Meert, F. Van Durme, N. Samyn, K. De Wael and P. Dardenne, *Drug Testing and Analysis*, **2018**, 10, 1039-1042.
https://doi.org/10.1002/dta.2364

Selected Articles on the Analysis of Drugs of Abuse in Biological Specimens
(Jan-June 2018)

Application of a screening method for fentanyl and its analogues using UHPLC-QTOF-MS with data-independent acquisition (DIA) in MSE mode and retrospective analysis of authentic forensic blood samples, C. Noble, P. Weihe Dalsgaard, S. Stybe Johansen and K. Linnet, *Drug Testing and Analysis*, **2017**, 10, 651-662. https://doi.org/10.1002/dta.2263

Cathinone stability in authentic urine specimens, L. Glicksberg, S. Rana and S. Kerrigan, *Forensic Science International*, **2018**, 286, 54-60.
http://www.sciencedirect.com/science/article/pii/S0379073818300689

Detection and quantification of codeine-6-glucuronide, hydromorphone-3-glucuronide, oxymorphone-3-glucuronide, morphine 3-glucuronide and morphine-6-glucuronide in human hair from opioid users by LC–MS-MS, M. Grabenauer, N. D. Bynum, K. N. Moore, R. M. White, J. M. Mitchell, E. D. Hayes and R. Flegel, *Journal of Analytical Toxicology*, **2018**, 42, 115-125.
http://dx.doi.org/10.1093/jat/bkx086

The distribution and redistribution of fentanyl & norfentanyl in post mortem samples, C. N. Chatterton and M. Scott-Ham, *Forensic Science International*, **2018**, 284, 146-152.
http://www.sciencedirect.com/science/article/pii/S0379073817305479

Distribution of furanyl fentanyl and 4-ANPP in an accidental acute death: A case report, H. F. H. Martucci, E. A. Ingle, M. D. Hunter and L. N. Rodda, *Forensic Science International*, **2018**, 283, e13-e17. http://www.sciencedirect.com/science/article/pii/S0379073817305121

Estimation of Measurement Uncertainty in Quantitation of Benzoylecgonine (BZE) and 11-nor-Δ9-THC-9-carboxylic acid (THCA), D. P. Arfsten, E. Roman Perez and N. C. Goebel, *Journal of Analytical Toxicology*, **2018**, 42, 141-148. http://dx.doi.org/10.1093/jat/bkx100

Fatal intoxication by 5F–ADB and diphenidine: Detection, quantification, and investigation of their main metabolic pathways in humans by LC/MS/MS and LC/Q-TOFMS, M. Kusano, K. Zaitsu, K. Taki, K. Hisatsune, J. i. Nakajima, T. Moriyasu, T. Asano, Y. Hayashi, H. Tsuchihashi and A. Ishii, *Drug Testing and Analysis*, **2017**, 10, 284-293. https://doi.org/10.1002/dta.2215

Fatal Overdose of Gamma-hydroxybutyrate Acid After Ingestion of 1,4-Butanediol, L. G. Erwan, M. Vadim, C. Raphael, D. Christophe, T. Gilles and H. Valery, *Journal of Forensic Sciences*, **2018**, 63, 326-329. https://onlinelibrary.wiley.com/doi/abs/10.1111/1556-4029.13510

Fatality Following Ingestion of Tetrahydrofuranylfentanyl, U-49900 and Methoxy-Phencyclidine, A. J. Krotulski, D. M. Papsun, M. Friscia, J. L. Swartz, B. D. Holsey and B. K. Logan, *Journal of Analytical Toxicology*, **2018**, 42, e27-e32. http://dx.doi.org/10.1093/jat/bkx092

Fatality involving ocfentanil documented by identification of metabolites, N. Allibe, C. Richeval, M. Phanithavong, A. Faure, D. Allorge, F. Paysant, F. Stanke-Labesque, H. Eysseric-Guerin and J.-M. Gaulier, *Drug Testing and Analysis*, **2017**, 10, 995-1000. https://doi.org/10.1002/dta.2326

Field-based detection of biological samples for forensic analysis: Established techniques, novel tools, and future innovations, J. Morrison, G. Watts, G. Hobbs and N. Dawnay, *Forensic Science International*, **2018**, 285, 147-160.
http://www.sciencedirect.com/science/article/pii/S0379073818300458

Identification of 5-Fluoro ADB in Human Whole Blood in Four Death Cases, K. Usui, Y. Fujita, Y. Kamijo, T. Kokaji and M. Funayama, *Journal of Analytical Toxicology*, **2018**, 42, e21-e25. http://dx.doi.org/10.1093/jat/bkx088

Multiple fatalities in the North of England associated with synthetic fentanyl analogue exposure: Detection and quantitation a case series from early 2017, L. Hikin, P. R. Smith, E. Ringland, S. Hudson and S. R. Morley, *Forensic Science International*, **2018**, 282, 179-183. http://www.sciencedirect.com/science/article/pii/S0379073817304942

Quantitation of Cocaine and Metabolites, Phencyclidine, Butalbital and Phenobarbital in Meconium by Liquid Chromatography–Tandem Mass Spectrometry, T. L. Scroggin and G. A. McMillin, *Journal of Analytical Toxicology*, **2018**, 42, 177-182. http://dx.doi.org/10.1093/jat/bkx097

Quantitative analysis of drugs in hair by UHPLC high resolution mass spectrometry, R. Kronstrand, M. Forsman and M. Roman, *Forensic Science International*, **2018**, 283, 9-15. http://www.sciencedirect.com/science/article/pii/S037907381730508X

Quantitative estimation of α-PVP metabolites in urine by GC-APCI-QTOFMS with nitrogen chemiluminescence detection based on parent drug calibration, S. Mesihää, I. Rasanen and I. Ojanperä, *Forensic Science International*, **2018**, 286, 12-17. http://www.sciencedirect.com/science/article/pii/S0379073818300690

A Series of Deaths Involving Carfentanil in the UK and Associated Post-mortem Blood Concentrations, S. P. Elliott and E. Hernandez Lopez, *Journal of Analytical Toxicology*, **2018**, 42, e41-e45. http://dx.doi.org/10.1093/jat/bkx109

A simple validated multi-analyte method for detecting drugs in oral fluid by ultra-performance liquid chromatography–tandem mass spectrometry (UPLC–MS/MS), Y. Zheng, E. Sparve and M. Bergström, *Drug Testing and Analysis*, **2017**, 10, 1001-1008. https://doi.org/10.1002/dta.2325

Simultaneous drug identification in urine of sexual assault victims by using liquid chromatography tandem mass spectrometry, H. H. Lee, S. C. Chen, J. F. Lee, H. Y. Lin and B. H. Chen, *Forensic Science International*, **2018**, 282, 35-40. http://www.sciencedirect.com/science/article/pii/S0379073817304620

Three Cases of Fatal Acrylfentanyl Toxicity in the United States and a Review of Literature, D. C. Butler, K. Shanks, G. S. Behonick, D. Smith, S. E. Presnell and L. M. Tormos, *Journal of Analytical Toxicology*, **2018**, 42, e6-e11. http://dx.doi.org/10.1093/jat/bkx083

U-47700: A Not So New Opioid, T. P. Rohrig, S. A. Miller and T. R. Baird, *Journal of Analytical Toxicology*, **2018**, 42, e12-e14. http://dx.doi.org/10.1093/jat/bkx081

The Validation of ELISA Screening According to SWGTOX Recommendations, N. B. Tiscione, *Journal of Analytical Toxicology*, **2018**, 42, e33-e34. http://dx.doi.org/10.1093/jat/bkx095
