Definition of Child Sex Tourism

The **sexual exploitation of children** by a person or persons who **travel** from their home district, home geographical region, or home country in order to have sexual contact with children. Child sex tourists can be **domestic travellers** or they can be **international tourists**. Child Sex Tourism often involves the use of accommodation, transportation and other tourism-related services that facilitate contact with children and enable the perpetrator to remain fairly inconspicuous in the surrounding population and environment”
