The Drug War, Mass Incarceration and Race

June 2015

With less than 5 percent of the world’s population but nearly 25 percent of its incarcerated population\(^1\), the United States imprisons more people than any other nation in the world – largely due to the war on drugs. Misguided drug laws and harsh sentencing requirements have produced profoundly unequal outcomes for people of color. Although rates of drug use and sales are similar across racial and ethnic lines, Black and Latino people are far more likely to be criminalized than white people.\(^2\)

The Drug War Drives Mass Incarceration and Racial Disparities in U.S. Judicial Systems

There were more than 1.5 million drug arrests in the U.S. in 2013. The vast majority – more than 80 percent – were for possession only.\(^4\) At year-end 2012, 16 percent of all people in state prison were incarcerated for a drug law violation – of whom nearly 50,000 were incarcerated for possession alone.\(^5\) More than 50 percent of people in federal prisons are incarcerated for drug law violations. About 500,000 Americans are behind bars on any given night for a drug law violation\(^6\) – ten times the total in 1980.\(^7\)

People of color experience discrimination at every stage of the judicial system and are more likely to be stopped, searched, arrested, convicted, harshly sentenced and saddled with a lifelong criminal record. This is particularly the case for drug law violations.

Black people comprise 13 percent of the U.S. population,\(^9\) and are consistently documented by the U.S. government to use drugs at similar rates to people of other races.\(^10\) But Black people comprise 30 percent of those arrested for drug law violations\(^11\) – and nearly 40 percent of those incarcerated in state or federal prison for drug law violations.\(^12\)

Similarly, Latinos make up 17 percent of the U.S. population, but comprise 20 percent of people in state prisons for drug offenses, and 37 percent of people incarcerated in federal prisons for drug offenses.\(^13\) In 2013, Latinos comprised almost half (47 percent) of all cases in federal courts for drug offenses.\(^14\)

In total, approximately 57 percent people incarcerated in state prisons, and 77 percent of people incarcerated in federal prisons for drug offenses are Black or Latino, compared to 30 percent of the U.S. population.\(^15\)

Widely adopted in the 1980s and ‘90s, mandatory minimum sentencing laws have contributed greatly to the number of people of color behind bars.\(^16\) Research shows that prosecutors are twice as likely to pursue a
mandatory minimum sentence for Black people as for white people charged with the same offense.\textsuperscript{17} Among people who received a mandatory minimum sentence in 2011, 38 percent were Latino and 31 percent were Black.\textsuperscript{18}

\textbf{Nearly 80 percent of people in federal prison and 60 percent of people in state prison for drug offenses are Black or Latino.}\textsuperscript{19}

\textbf{Mass Incarceration Destroys Families}

2.7 million children are growing up in U.S. households in which one or more parents are incarcerated. Two-thirds of these parents are incarcerated for nonviolent offenses, including a substantial proportion who are incarcerated for drug law violations. One in nine Black children has an incarcerated parent, compared to one in 28 Latino children and one in 57 white children.\textsuperscript{20}

\textbf{Collateral Consequences of Mass Incarceration}

Punishment for a drug law violation is not only meted out by the criminal justice system, but is also perpetuated by policies denying child custody, voting rights, employment, business loans, licensing, student aid, public housing and other public assistance to people with criminal convictions. Criminal records often result in deportation of legal residents or denial of entry for noncitizens trying to visit the U.S. Even if a person does not face jail or prison time, a drug conviction often imposes a lifelong ban on many aspects of social, economic and political life.\textsuperscript{21}

\textit{“Nothing has contributed more to the systematic mass incarceration of people of color in the United States than the War on Drugs.”}

Such exclusions create a permanent second-class status for millions of Americans, and, like drug war enforcement itself, fall disproportionately on people of color. Nearly eight percent of Black people of voting age are denied the right to vote because of laws that disenfranchise people with felony convictions.\textsuperscript{24}

\textbf{Policy Recommendations}

1. Decriminalize drug possession, removing a major cause of arrest and incarceration of primarily people of color, helping more people receive drug treatment and redirecting law enforcement resources to prevent serious and violent crime.

2. Eliminate policies that result in disproportionate arrest and incarceration rates by changing police practices, rolling back harsh mandatory minimum sentences, and repealing sentencing disparities.\textsuperscript{25}

3. End policies that exclude people with a record of arrest or conviction from key rights and opportunities. These include barriers to voting, employment, public housing and other public assistance, loans, financial aid and child custody.
