### Selected Articles on the Analysis of Drugs of Abuse in Seized Material (January – July 2007)

#### AMPHETAMINES (AMPH)

##### General (GENRL)
- **Casale, J., et al.** The characterization of 4-methoxy-N-ethylamphetamine hydrochloride. (Technical Note)  

##### Gas Chromatography/Mass Spectrometry (GC-MS)
- **Engblom, C., et al.** Driving under the influence of drugs–amphetamine concentrations in oral fluid and whole blood samples.  

#### Cannabis (CANNABIS)

- **Shibuya, E.A., et al.** Carbon and nitrogen stable isotopes as indicative of geographical origin of marijuana samples seized in the city of São Paulo (Brazil).  
General (GENRL)

Gas Chromatography (GC)

Gas Chromatography/Mass Spectrometry (GC-MS)

Drugs Not Under Int. Control (DNUC)

General (GENRL)

**Colour tests (COLOUR)**

- Sarwar, M.  
A new, highly specific color test for ketamine (Technical Note)  

**Miscellaneous (MISC)**

**General (GENRL)**

- Causin, V., et al.  
A quantitative differentiation method for plastic bags by wide angle X-ray diffraction for tracing the source of illegal drugs.  

**None (NONE)**

**General (GENRL)**

- Fatta, D., et al.  
Analytical methods for tracing pharmaceutical residues in water and wastewater.  

**Gas Chromatography (GC)**

- Ouyang, G., et al.  
Calibration of solid-phase microextraction for quantitative analysis by gas chromatography.  

**Precursors (PREC)**

**High Performance Liquid Chromatography (HPLC)**

- Eng, A.W.T., et al.  
Evaluation of surfactant assisted pressurized liquid extraction for the determination of glycyrrhizin and ephedrine in medicinal plants.  

**None**

- Barker, W.D., et al.  
A study of the use of ephedra in the manufacture of methamphetamine.
