### ***Drug Control Activities and Methods of Intervention:***

---

Prevention and education.

As the drug abuse problem is not a priority in Mongolia, there are no specific drug demand reduction programmes carried out by the National Society. The work is limited to the general activities which will reduce the impact of societal factors that lead to this social problem. For instance, MRCS aim to bring up the children in healthy family environment and work with street children, organize educational activities in schools and kindergartens, conduct dissemination campaigns, etc.

**Other Areas:** Community based health, social welfare, youth, information and dissemination programmes.

Treatment, rehabilitation

Therapeutic Community with the Spiritual Approach: The Restorer of the Breach is named as such because of the broken relationship the programmers (clients) have with the Lord. Through this ministry the programmers are restored back in their relationship with God. The belief that drug addiction is a sin entails a spiritual approach to the dilemma.

***Drug Control Activities and Methods of Intervention:***

---

Prevention, education, treatment, counselling, rehabilitation, research and training.

No pharmaceutical substances or substitutes for treatment of addiction are used. Within the therapeutic communities, addict's voluntary attendance/active participation are essential. Recovery has three phases: counselling centre, therapeutic community, rehabilitation centre. Parallel programme for the close family environment. Prevention programmes deal with primary and secondary prevention as well as training to prevention agents, professionals, teachers and parents.
