Briefing on the Global Programme on Cybercrime

in the margins of the Third Session of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes

Date: 30 August 2022
Time: 1:15-2:30 p.m.
Venue: Conference Room 1, UNHQ

Background

The United Nations Office on Drugs and Crime’s Global Programme on Cybercrime was established in 2013 to assist Member States in the struggle against cyber-related crimes through capacity building and technical assistance, resulting from General Assembly resolution 65/230 (2011) and the resolutions 22/7 and 22/8 of the Commission on Crime Prevention and Criminal Justice.

The Programme addresses interrelated aspects to cybercrime: prevention, detection, investigation, prosecution and sentencing/adjudication. The Global Programme on Cybercrime, which operates in Central and South America, Central and West Africa and Southeast Asia and the Pacific, is open for requests of technical support in cybercrime for all UN Member States. At the same time, it provides a vehicle for donations to implement cybercrime support to voluntary donors of UNODC.

This side event will present with the main products and results of the Global Programme on Cybercrime around world. Participants to this meeting can expect to know about the options that UNODC has to technically support Member States in responding to cybercrime challenges.

Agenda

13:15 – 13:20  Introductory remarks
