

Tatiana Terekhova has a leading role in the partnership programme, engagement with non-state actors, and illegal traffic and trade of hazardous chemicals and waste under the Basel, Rotterdam and Stockholm Conventions. Tatiana implements a number of capacity-building activities, including in relation to marine pollution and plastic wastes. She deals with the Sustainable Development Goals, in particular its indicators and governance issues of the Basel and Stockholm conventions regional centres. Prior to this function, she was coordinating capacity-building activities for the implementation of the Basel, Rotterdam and Stockholm Conventions Convention, including the E-waste Africa programme.

She has been in the United Nations family for over 18 years. This includes the UN Environment Programme where she managed the Quick Start Programme Trust Fund of the Strategic Approach to International Chemicals Management (SAICM) and the UN Institute for Training and Research where she provided assistance to developing countries and countries in economy in transition in various areas of sound chemicals and wastes management. Tatiana is a national of the Russian Federation. She has a background in international environmental law and law degrees from Russia and Switzerland.
