• Yearly global data collection to capture core indicators – 141 countries covered
• Largest dataset on TiP from 2003 to 2021,
  – Info on 450,000 detected victims
  – On 300,000 (suspected) offenders
  – Detailed narrative from 800 cases (4,365 victims, 2,525 offenders)
Fewer trafficking victims detected during the Covid-19 pandemic after years of increase

Total victims detected per 100,000 population, 2003-2020

Evidence substantiates this is the results of three main factors

Reduced capacity in detecting trafficking victims

Reduced opportunities for traffickers to operate

Victims of sexual exploitation were moved to more concealed locations
Fewer trafficking victims detected during the Covid-19 pandemic, especially TiP for Sexual Exploitation

24% reduction compared to 2019 in the detection of victims trafficked for sexual exploitation.

Percentage change in the number of detected victims of sexual exploitation from 2019 to 2020, by region:

- North America: +16%
- Sub-Saharan Africa: +5%
- Central and South-Eastern Europe: +3%
- Eastern Europe and Central Asia: -29%
- South Asia: -31%
- Western and Southern Europe: -40%
- South America: -49%
- Central America and the Caribbean: -51%
- East Asia and the Pacific: -57%
- North Africa and the Middle East: -64%

Global slowdown in convictions accelerated during the Covid-19 pandemic

In 2020, convictions
27% down from 2019
44% down from 2017

Source: UNODC elaboration of national data.
Less convictions, more trafficking

Subregions by average number of trafficking convictions and number of victims detected per 100,000 population, 2020 (or most recent)*

Number of destination countries where victims originating within and outside of the region were detected, 2017-2020

- **The Americas**: 37
- **Europe**: 22
- **Global**: 3
- **Asia**: 11
- **Africa and the Middle East**: 9
- **Sub-Saharan Africa**: 15
- **South Asia**: 11
- **East Asia**: 14
- **South America**: 9
- **Eastern Europe and Central Asia**: 5
- **Central America**: 4
- **North Africa and the Middle East**: 3
- **Western and Central Europe**: 2

*Data as of 2020 (or most recent)
Female victims and children suffer more violent forms of trafficking

Victims of trafficking are exposed to different levels of violence

**Female victims** are 3 times more likely to suffer violent forms of trafficking

**Child victims** 1.7 times more than adults
