

Philipp is the Head of Strategy, Expertise & Stakeholder Management at the European Cybercrime Centre (EC3) and oversees the delivery of strategic and tactical cyber-security and cybercrime related products such as Europol's Internet Organised Crime Threat Assessment. Other key areas of responsibility include the assessment of current and future technology trends, managing EC3's industry advisory groups and academic advisory network, prevention & awareness, and capacity building.

Prior to that, he held positions with various international organisations such as the Organisation for the Prohibition of Chemical Weapons, the International Criminal Court, the Organization for Security and Co-operation in Europe and the Comprehensive Nuclear-Test-Ban Treaty Organization.

Philipp has more than 20 years of relevant experience in cyber security management, combatting cybercrime, policy development, digital forensics and the analysis and management of intelligence.

Philipp has worked in various fields, including the financial sector, global disarmament and arms control, international investigations and on issues related to safety and security in cyberspace, topics he deeply cares about. He is also a member of ENISA's Advisory Group, the World Economic Forum's International Alliance against Cybercrime and Carnegie Endowment's FinCyber Strategy Project.

His professional experience is complemented by a PhD degree and a Master's degree in business informatics from the University of Vienna. He also holds an MSc in Forensic Computing and Cybercrime Investigation from the University College Dublin.
