CND Dec.5(1). Re-establishment at its pre-war level of international control of narcotic drugs

With regard to those countries which had not yet resumed full collaboration with the international organs of control (Commission on Narcotic Drugs, Permanent Central Opium Board and Supervisory Body), the Commission decided:

- (a) To request them to furnish as soon as possible information on conditions during the war and on the present state and functioning of their national narcotics administrations;
- (b) To ask them to resume, at the earliest date possible, collaboration with the international organs of control in accordance with the narcotics conventions to which they are parties;
- (c) To offer them such technical assistance as they may require with a view to re-establishing their national controls at pre-war levels (for example, in some countries all statistical records, archives, etc., relating to drug control were destroyed).
