1946

**CND Dec.8(1). Re-establishment at its pre-war level of international control of
narcotic drugs**

With regard to the future location of the Permanent Central Opium Board and the Supervisory Body, the Commission decided to recommend that the Economic and Social Council, when examining this question and making the necessary arrangements with the Permanent Central Opium Board under article 20 of the 1925 Convention, should give due consideration to the opinions expressed by these two bodies, and particularly to their view that the conditions which made it necessary that their work be located in Europe will probably last through 1947.
