CND Res.4(I). Abolition of opium-smoking in the Far East

The Commission on Narcotic Drugs

To fulfil the stipulation embodied in article 6 of the international drug convention signed at The Hague on 23 January 1912 concerning the suppression of the manufacture of, internal traffic in, and use of prepared opium;

Considering that the Governments of the United Kingdom, France, the Netherlands and Portugal had decided to adopt the policy of complete prohibition of opium-smoking in all their territories in the Far East and had taken measures to give effect to this policy;

Recommends that the Economic and Social Council urge all countries which still legalize the use of opium for smoking to take immediate steps to prohibit the manufacture, internal traffic in and use of such opium.
