CND Dec.A2(VII). CND Decision

The Commission decided to inform the Council that in its view, the interests of the international control of narcotics would best be served if it were to continue its general practice of meeting in April and May of each year. Should it prove impossible in 1953 for the Commission to meet at Headquarters during these months, The Commission recommended that its eighth session should be held in Geneva, Switzerland. The Commission considers that a maximum of four weeks should be allocated for the session.

April/May 1952
