Education in schools and universities on anti-corruption efforts

According to the Law on the Anti-Corruption Agency (hereinafter referred to as the ACA), the ACA is introducing and implementing education programs concerning corruption, co-operates with research organizations and civil society organizations (CSO) in implementing corruption prevention activities. Anti-corruption endeavours of the ACA related to education also encompass certain programmes in which schools and universities have also been included.

International Projects

Cooperation with universities has been realized in the framework of two internationally funded projects, which were successfully implemented. Namely, the ACA developed partnership with the civil society and some universities of social sciences and humanities aiming to increase the knowledge and awareness over anti-cooperation issues among students. Project paid special attention to prevention of corruption through organization of specialized training courses to students and recent graduates in the field of anti-corruption, and by establishing network of interns from the ACA. Topics of the training modules pertained to corruption as a cultural, economic and political phenomenon, captured state theory, Serbia's anti-corruption legal framework, money laundering, public procurement, audit of public finances, free access to information, etc. The program, called “Anti-corruption skills” has lasted for two months and after the series of lectures and workshops students took an exam, assessing their knowledge. Based on the results of the exam, seven students were selected to join sponsored internship at the various sectors of the ACA.

Apart from that, the ACA has also implemented the project “Youth Sleuth: Engaging Serbia’s Youth to Fight Corruption through Investigative Journalism and Social Media” (implemented through assistance of the UNDP) which was to reduce corruption by raising public awareness and fueling intolerance. In partnership with CSOs and the ACA, young journalists conducted independent, non-offensive and professional research based on which they wrote and disseminated stories, case studies and investigative articles on corruption through web sites, blogs,
Facebook, Twitter, etc. Their publication through social media was to both uncover facts and mobilize outcry against corruption. As a result of the research work of these students, 25 very important stories and articles were published in almost all printing media in Serbia as well as some web portals.

Within the project “Support to the Anti-Corruption Agency in Fight against Corruption” (implemented through assistance of the Norwegian Ministry of Foreign Affairs) the network of 42 interns was established, consisting of young professionals, students of final study year or graduated students, selected from several faculties of social sciences. Six cycles of 4-month internship program (each encompassing seven interns) were organized, with the aim of contributing to general and professional awareness raising on fight against corruption through the education. This project component was focused on bringing closer the significance of fight against corruption to young people and encouraging them to take into account their possible future professional engagement in the respective area. As a follow up activity of this project, group of interns and internship candidates was offered a three day training program, in the form of training for instructors. After the training a team was formed consisting of 22 educators, whose primary activity was promoting a competition launched by the ACA on the occasion of the International Anti-Corruption Day. The educators promoted the competition in elementary and high schools in Belgrade. In addition, former ACA interns founded two CSOs and continued promoting the significance of curbing corruption and contributing to anti-corruption awareness raising through projects, especially focusing on young population. In cooperation with the ACA, the respective CSOs conducted anti-corruption trainings in the selected schools in Serbia. The ACA also used capacities of interns for the purpose of its researches related to integrity plan verification in the corruption prone areas.

**Cooperation Agreements**

Cooperation with some of education institutions has also been formalized through Cooperation Agreements. The ACA signed Cooperation Agreements with four faculties, i.e. Faculty of Political Sciences (Belgrade), Faculty of Law (Belgrade), Academy of Criminalistic and Police Studies (Belgrade) and Faculty of Organizational Sciences (Belgrade). These Agreements established a basis for continuous and long-term cooperation which, inter alia, relates to education and trainings in the anti-corruption and related fields to be provided to interested students by the ACA experts, but also to ACA staff on the part of relevant professors and lecturers from the respective educational institutions; strengthening professional and research capacities through exchange of experiences and information in the area of prevention and fight against corruption;
supporting each others' anti-corruption initiatives, etc.

In particular the Cooperation Agreement with the Faculty of Law also addresses continuation of close cooperation between ACA and Anti-Corruption Legal Clinic within the Faculty of Law for the purpose of training of interested students of law on practical skills and methods required for competent and professional execution of their future jobs. Since the initiation of this Legal Clinic, the ACA has significantly contributed to its operation through lectures given by the ACA’s experts, donations of relevant literature, provision of legal aid to the clients of the Clinic, etc.

Raising awareness on combating corruption

On the occasion of International Anti-Corruption Day, to date the ACA has organized six competitions related to primary, high schools and university students in Serbia, thus inviting them to present their literary or journalist text, artwork, audio-visual work and slogans on the given topic. The best works were given awards. These activities were focused on raising awareness of citizens, primarily pupils and their teachers, on the necessity for active involvement in fighting corruption. The ACA also conducts occasional trainings for students and young population related to combating corruption.

Corruption risk assessment in education area

By implementing the methodology for corruption risk assessment in legislation, the ACA analyzes pieces of legislation governing the area of textbooks for elementary and high schools with an aim to identify provisions susceptible to corruption as well as corruption related risks and provide the corresponding recommendations. These risks relate to, inter alia, process of selection of textbooks as well as criteria for making final decision.

In addition, in its capacity to coordinate the state bodies in the prevention of corruption, the ACA organized series of meetings addressing the problem of corruption in education. Namely, based on the risks identified in the integrity plans but also in the relevant legislation, the ACA initiated establishment of the working group (composed of the line Ministry and other important stakeholders’ representatives) who drafted the recommendations for improvement of the institutional and legislative framework. Risks have been prevalent in the area of transparency and public procurement.

Article 13

Education anti-corruption programmes

- According to the Law on ACA, the ACA is introducing and implementing education programs concerning corruption, co-operates with research organizations and civil society organizations in implementing corruption prevention activities. Cooperation pertains to joint activities in the implementation of the National Anti-Corruption Strategy (NACS), Action Plan, educational programs, analyzing the state of corruption, organizing media campaigns and other activities relevant for prevention of corruption. According to the recently adopted NACS, the ACA is to establish a system for continuous coordination and training for civil society organizations;

- In order to unify the process of cooperation with civil society, being of utmost significance for the Article 13 of the UNCAC, ACA drafted Guidelines for its cooperation with civil society, regulating principles, preconditions and types of the respective cooperation.

- With the technical assistance of the USAID Justice Reform and Government Accountability Project, ACA developed partnership with the civil society and some universities of social sciences and humanities aiming to increase the knowledge and awareness over anti-cooperation issues among students. Project pays special attention to prevention of corruption through organisation of specialised training courses to students and recent graduates in the field of anti-corruption, and by establishing network of interns from the ACA. Topics of the training modules pertain to corruption as a cultural, economic and political phenomenon, captured state theory, Serbia's anti-corruption legal framework, money laundering, public procurement, audit of public finances, free access to information, etc. The program, called “Anti-corruption skills” has lasted for two months and after the series of lectures and workshops students took an exam, assessing their knowledge. Based on the results of the exam, 7 students were selected to join sponsored internship at the ACA. The internship program will last 3 months and it will start in September 2013; This training course was intended to be the pilot program, with similar educational and tailor-made anti-corruption programmes being consequently developed and incorporated into regular universities as well as high schools’ curricula;
Within the project “Support to the ACA in Fight against Corruption” (implemented through technical assistance of the Norwegian Ministry of Foreign Affairs) the network of 42 interns was established, consisting of young professionals, students of final study year or graduated students, selected from several faculties of social sciences. Six cycles of 4-month internship program (each encompassing 7 interns) were organized, with the aim of contributing to general and professional awareness raising on fight against corruption through the education. They attended various lectures organized by the ACA on regular basis, pertaining to issues such as corruption prevention, political party funding, complaints and whistle-blower protection, control and prevention of conflict of interest, asset declaration control, registers, international anti-corruption legal framework, public relations, state administration, etc. They also participated in everyday ACA’s activities and gained their first professional experience. This project component was focused on bringing closer the significance of fight against corruption to young people and encouraging them to take into account their possible future professional engagement in the respective area. Internship candidates not having passed the selection process were also offered a three day seminar program on corruption prevention mechanisms and an additional seminar was organized for other students who had expressed an interest in undertaking this kind of education in the meantime;

As a follow up activity of this project, group of interns and internship candidates from 2011 and 2012 was offered a three day training program, in the form of training for instructors, based on which a group of peer educators on fight against corruption would be formed. After the training a team was formed consisting of 22 educators, whose primary activity was promoting a competition launched by the ACA on the occasion of the International Anti-Corruption Day. The educators promoted the competition in primary schools and high schools in Belgrade. Some team members, who were also members of non-government youth organizations, took on the project idea, and applied for donations in partnership with the ACA.

Public awareness programmes for children

ACA children's page, as a part of ACA’s official website (http://www.acas.rs/sr_cir/deja-strana.html), pertains to engagement through public competitions, learning about corruption and its consequences through pictures and comic. On the occasion of 9 December, the International Anti-corruption Day, the ACA has issued three calls for application so far, notably in 2010, 2011 and 2012. The competition relates to primary, high school and university students in Serbia, inviting them to present their literary or journalist text, artwork, audio-visual work and slogans on the given topic. The best works were given awards. These activities are focused on raising awareness of citizens, primarily pupils and their teachers, on the necessity for active involvement in fighting corruption. Schools, which had motivated and encouraged their pupils to participate in the competition for the third consecutive year were awarded special
prizes.

Internet as a successful platform

• The project “Youth Sleuth: Engaging Serbia’s Youth to Fight Corruption through Investigative Journalism and Social Media” (implemented through technical assistance of the UNDP) is to reduce corruption by raising public awareness and fuelling intolerance; In partnership with NGOs and the ACA, young journalists conduct independent, non-offensive and professional research based on which they write and disseminate stories, case studies and investigative articles on corruption through web sites, blogs, Facebook, Twitter, etc.;

• A group of nine students and at the same time highly motivated young journalists was competitively selected to intern in three highly renowned NGOs: Transparency Serbia, Eutopija, Serbia on the Move which deal with corruption issues; these students are to research corruption in Serbia in parallel with learning investigative journalism skills. Their publication through social media is to both uncover facts and mobilize outcry against corruption; The respective NGOs are capacitated to coach and counsel young journalists, to provide them with information and baseline for investigative stories and help them publishing stories through internet and social networks; The investigative stories are also available on ACA's website (via direct links); As a result of the research work of these students, 25 very important stories and articles were published in almost all printing media in Serbia as well as some web portals;

• Facebook page within this project, notably “Mi-To ne damo” (“We don't give bribe”), being administered by young journalists themselves;

• The Project “Support to the establishment of the ACA” (implemented through technical assistance of EU), i. e. its component regarding Raising Public Awareness and launching the micro website “Report corruption!” (www.prijavikoruciju.rs) pertains to the significant visitors' increase on ACA's Facebook page; the respective campaign used, inter alia, the following communication channels: TV and radio stations with national coverage, daily newspapers, social media (primarily Facebook, Twitter, blogs), websites.

Impact of public campaigns

• After launching Public Awareness campaign within the Project “Support to the establishment of the ACA” and the micro website “Report corruption!”, visitors' number both on FB and Twitter page of ACA doubled in comparison to the period prior to the respective campaign and is still increasing; so far 3.465 FB page likes, out of which 20% and 33% of users being 18-24 and 25-34 years old, respectively; 1.769 followers on Twitter; FB and Twitter page are also accessible
through the ACA’s official website.

Challenges

• Many of media outlets, daily print and electronic, are oriented to sensational stories/journalism, without real professional investigative journalism principles;

• Given that the ACA attaches great importance to the cooperation with civil society, one of the main challenges in this regard relates to the fact that there are few very experienced NGOs dealing with fight against corruption. However, further development of fight against corruption NGO network is needed;

• Communication challenges in reaching young people are being solved through ACA’s FB and Twitter page, as well as young journalists stories (in the aforementioned project) disseminated through various Internet channels.

Technical assistance

• Interactive case studies Workshops with students, journalists and different AC institutions;

• Educational Youth programmes/campuses;

• Developing an adequate curriculas suitable to be used through social networks such as on-line courses, different videos, short movies, animations, games.
