A. IT-based Confidential Reporting

A rSC-initiative under the auspices of the Constitutional Integrity Group (CIG) composed of the CSC, COA and Office of the Ombudsman - the project aims to provide a venue for confidential reporting of anomalies/irregularities in government. This web-based program would enable the public to provide information on nefarious activities of government officials and/or employees without the need to provide their personal information. The program would also allow them to monitor the progress of the investigation of their complaint.
