

Task Force on Victimization Surveys for Latin America and the Caribbean

LACSI

Latin America and the Caribbean Crime Victimization Survey Initiative

ANNEX QUESTIONNAIRE

Optional crimes

English version 2.0

July 2016

Note: Optional crimes (or non-nuclear crimes) will be entirely of voluntary use and at the discretion of the authorities of each country. If any of the countries decide to include any of the optional crimes, it is recommended that the logic in this Annex is followed. The reason why they were deliberately left out of the nuclear questionnaire is that they are not of the concern to all the countries in the region.

This questionnaire uses the International Classification of Crime for Statistical Purposes (ICCS) categories following the event description principles instead of criminal typologies. ICCS is a methodological tool for the statistic classification of crimes, promoted by the United Nations Office on Drugs and Crime.

The VICLAC questionnaire is the result of discussions held at three meetings of the Task Force on Victimization Surveys for Latin America and the Caribbean. These meetings were financed by the Office of the United Nations on Drugs and Crime (UNODC); the Center of Excellence in Statistical Information on Government, Crime, Victimization and Justice (CoE UNODC-INEGI); the Inter-American Development Bank (IDB); and the United Nations Development Programme (UNDP).

The questionnaire has been written and edited by staff from the Office of the United Nations for Drugs and Crime (UNODC), and the Center of Excellence in Statistical Information on Government, Crime, Victimization and Justice (CoE).
