

# THE FUTURE AFTER THE COVID-19 OUTBREAK

**NAOMI OLOYEDE**

Pandemic ...Corona virus ... I hear these big words on the news every day and see how lives have been affected. No school, no movement and we don't know how long it will last.

This is not the world I want to live in as a child. The future that I want after this Corona Virus outbreak should be one where nothing or anyone is taken for granted, so that the lives and safety of human being would be secured.

The whole nation of the world should see themselves as one family because what affects one can affect the other. Let's build a world where we would reach out to one another both in good times and in bad times.

I would want the whole world, stakeholders, law makers to take a quick and good decision whenever there is a situation that has to do with the wellbeing of the people in order to be safe.

Health care should be taken seriously in every nation of the world. The health status of every individual should be verified from time to time in order to know if there are any negative symptoms that needs to be dealt with immediately because health is wealth.

In conclusion, I will like to appeal to the government, policy makers, stakeholders, institution to take precaution and also take good care of health workers and provide them with Personal Protective Equipment (PPE).

I want to see a future where the life of children and youth of the world are secured because children are secondary victim to any pandemic or disease.
