

# UNODC EVALUATION QUALITY ASSESSMENT SUMMARY OF EVALUATIONS CONDUCTED IN 2022

UNODC evaluation reports have been rated by independent reviewers since 2014 for alignment with UNEG and UNODC evaluation standards. The 2022 batch of **14 reports** were of comparable quality to those rated in the previous two years.

The standard evaluation quality assessment (EQA) grid includes ~50 criteria. It is reviewed annually and revised as needed to reflect emerging requirements and priorities; a change in 2022 was for all reports to be fully disability inclusive. Another change in 2022 was the introduction of a second EQA grid for the review of UNODC’s new and more concise Independent Project Evaluation format.
