15:25

#### *Questions and answers*

15:35

#### *Concluding remarks by the Chair*

*HIV prevention, treatment, care and support services are, generally, not gender responsive. The specific needs of women who use drugs are often not met, which deters many of them from accessing HIV services.*

*Join us for a discussion promoting good practices in the provision of comprehensive HIV prevention, treatment, care and support services for women who use drugs in the community and in prison settings.*
