COVID-19 and the COVID-19 pandemic (Social Distancing)  

Social distancing has become necessary during the COVID-19 pandemic. Many countries have advised their citizens to maintain social distancing to reduce the spread of the virus.

Organizations like the World Health Organization (WHO), UNODC, and UN AIDS have provided guidance on how to maintain social distancing.

HIV Prevention, Treatment and Care for Injecting Drug Users (Tuberculosis and Malaria)  

UNODC has issued guidelines on how to prevent, treat, and care for HIV and tuberculosis among drug users. These guidelines are aimed at reducing the co-infection rate of HIV and tuberculosis among drug users.
