Overcrowding leads to increased HIV risk behaviour and violence
Exclusion is not an option

Every year more than 30 million people worldwide enter and leave prison systems

No community remains unaffected

HIV prevention for prisoners is HIV prevention for all
Good prison health is good public health

Every year more than 30 million people worldwide enter and leave prison systems and rejoin their communities.

HIV/AIDS in prisons affects us all.
Good prison health is **good prison management**

Protecting and promoting prisoners' health benefits everyone

Doing so improves workplace health and safety of prison staff

Respect for prisoners' rights is respect for human rights

Loss of liberty is the punishment—loss of access to HIV/AIDS services is not
Equitable health standards for all

Prisoners are entitled without discrimination to a standard of health care equivalent to that available in the general community.

HIV/AIDS in Prisons

United Nations Office on Drugs and Crime

Worldwide more than 13 million men, women and young people inject drugs

Exclusion is not an option

HIV prevention for injecting drug users is HIV prevention for all

AIDS@unodc.org www.unodc.org
HIV respects no borders

Trafficking in persons—only prevention and care for all can stop the spread of HIV
