Selected Articles on the Analysis of Drugs of Abuse in Seized Material
(July–December 2008)

**AMPHETAMINES (AMPH)**

**General**

- **Bonadio, F. et al.** Headspace solid-phase microextraction (HS-SPME) and liquid–liquid extraction (LLE): Comparison of the performance in classification of ecstasy tablets (Part 2)  

- **Salouros, H. et al.** N-Cyanomethyl-N-Methyl-1-(3′, 4′-methylenedioxyphenyl)-2-propylamine: An MDMA manufacturing by-product  

**Gas Chromatography/Mass Spectrometry (GC-MS)**

- **Xin Zhang, J., Ming Zhang, D. & Guang Han, X.** Identification of impurities and statistical classification of methamphetamine hydrochloride drugs seized in China  

**Cocaine (COCAINEN)**

**General**

- **Dujourdy, L & Besacier, F.** Headspace profiling of cocaine samples for intelligence purposes  

**Opiates & Opioids (OPIATES)**

**General**

- **Hill, L.A. et al.** A screening test for heroin based on sequential injection analysis with dual-reagent chemiluminescence detection  
  Talanta, 76, (2008), 674–679

- **Lurie, I.S. & Toske, S.G.** Applicability of ultra-performance liquid chromatography tandem mass spectrometry for heroin profiling  
  J. of Chromatogr., 1188 (2008), 322-326
Chemical markers from the peracid oxidation of isosafrole
