Selected Articles on the Analysis of Drugs of Abuse in Seized Materials
(July – December 2013)

Determination of heroin and basic impurities for drug profiling by ultra-high-pressure liquid chromatography, I. S. Lurie, S. E. Driscoll, S. S. Cathapermal and S. Panicker, *Forensic Science International*, 2013, 231, 300-305

Impact of reaction parameters on the chemical profile of 3,4-methylenedioxymethamphetamine synthesized via reductive amination: Target analysis based on GC-qMS compared to non-targeted analysis based on GCxGC–TOF-MS, M. Schäffer, S. Dieckmann, M. Pütz, T. Kohles, U. Pyell and R. Zimmermann, *Forensic Science International*, 2013, 233, 201-211
