Webinar 1 – Overarching tools

UNODC Tools and Publications

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

UNODC provides normative, analytical and operational assistance to Member States for strengthening the effectiveness, fairness, and accountability of their criminal justice institutions to tackle crime, corruption and terrorism. As one of the main custodians of SDG 16: Peace Justice and Strong Institutions, UNODC has published a plethora of documents, websites and brochures with application to SDG 16, as a whole. The following are a list of links to important documents for SDG 16. The Criminal Justice section is further broken into sub-categories based on UNODC's work.

For each of the SDG Targets, the international community has agreed on specific indicators that are based either on data collected from administrative sources or on data derived from sample surveys and UNODC offers its experience in monitoring the relevant indicators to assess progress towards the SDGs.

In addition, UNODC's global collection of administrative and survey data on crime and criminal justice and the promotion of crime victimization surveys, provide the statistical evidence base for monitoring patterns and trends of crime and the criminal justice response to crime, and for evaluating policy interventions and crime prevention measures. Under SDG 16, UNODC is the international lead organizations for compiling statistical indicators for a number of SDG Targets and plays an important part in measuring other Targets as well.

UNODC overarching tools and research publications

UNODC collects data on crime and the operation of criminal justice systems in order to make policy-relevant information and analysis available in a timely manner to the international community.

UNODC works on the development of standards for national crime and criminal justice information systems and for the conduct of victimization surveys. The office also aims to enhance the cross-national comparability of data through the development of key indicators and data reporting tools.

Periodic reports on selected crime issues provide in-depth analysis on key topics of concern at the global and regional level.

Methodology & Standards

- The [International Classification of Crime for Statistical Purposes \(ICCS\)](#) provides a comprehensive framework for producing statistics on crime and criminal justice. Its primary unit of classification is the act or event that constitutes a criminal offence and the description of the criminal acts is based on behaviours and not on legal provisions. The ICCS is the tool to understand crime extent and drivers. Also, it is a formidable tool to improve quality of data on crime and criminal justice at national level and to support national efforts to monitor SDG targets in the areas of public security and safety, trafficking, corruption, and access to justice. The ICCS was endorsed by the United Nations Statistical Commission, at its 46th session in March 2015, and the Commission on Crime Prevention and Criminal Justice (CCPCJ) at its 24th session in May 2015 as an international statistical standard for data collection. The two Commissions have also confirmed UNODC as the custodian of the ICCS.
- The [Manual on Victimization Surveys](#) was developed by a joint UNECE-UNODC Task Force on Victim Surveys established in 2005, composed by representatives from Australia (Chair), Canada, Italy, Netherlands, Poland, UK, and USA. The Statistical Office of the European Commission (EUROSTAT), the European Agency for Fundamental Rights (EU-FRA) and the European Institute for Crime Prevention and Control, affiliated with the UN (HEUNI) also participated regularly in the work of the Task Force.
- [Latin America and the Caribbean Crime Victimization Survey Initiative](#) (all LACSI materials are available in 4 languages); Towards a common and robust methodology for conducting victimization surveys in Latin America and the Caribbean. This section describes the efforts of several countries in Latin America and the Caribbean, as well as some international organizations to develop a harmonized methodology and a common questionnaire seeking to standardize the measurement of victimization in the region in order to generate comparable data. In addition, to deepen the analysis of the Latin American context, comparable data from countries that have implemented Crime Victimization Surveys in the region are made available. Through this analysis it is possible to see how the information generated by Crime Victimization Surveys contributes to monitoring the progress of the 2030 Agenda for Sustainable Development and allows to carry out a more exhaustive analysis of the criminal phenomena.
- [United Nations Survey of Crime Trends and Operations of Criminal Justice Systems \(UN-CTS\)](#) The UN-CTS deals with information, primarily administrative statistics, on the main components of the criminal justice system (police, prosecution, courts and prisons). In addition, the UN-CTS collects available data from crime victimization surveys. Following ECOSOC Resolution 2015/24 (E/RES/2015/24) and driven by recommendations agreed upon at the [First Global Meeting of UN-CTS Focal Points in May 2016](#). UNODC has undertaken a review of the UN-CTS. Following a comprehensive round of consultation among UN-CTS Focal Points and Permanent Missions a revised data collection instrument was completed in July 2018. The UN-CTS was reviewed to bring it in line with the [International Classification of Crime for Statistical Purposes \(ICCS\)](#) and to enable countries to report data for [Sustainable Development Goal \(SDG\)](#) indicators for which UNODC is indicated as custodian agency by the United Nations Statistical Commission. This comprehensive consultation process, which also included representatives of relevant regional and international organizations, resulted in a revised UN-CTS data collection instrument and was considered a major improvement in the global data collection on crime and criminal justice by the [Joint Second Meeting of UN-CTS Focal Points and ICCS Technical Advisory Group in June 2018](#)

Centre of Excellence on Crime and Criminal Justice

- The [Center of Excellence for Statistical Information on Government, Crime, Victimization and Justice \(CdE\)](#) was created in 2010 with the purpose of initiating technical cooperation activities between the United Nations Office on Drugs and Crime (UNODC) and National Institute of Statistics and Geography of Mexico (INEGI). Its main objective is to strengthen statistical, analytical and monitoring capacities in the fields of government, victimization, public security and justice. The Centre provides technical assistance to countries in the region to improve the quality and quantity of crime statistics, public security, corruption, government and justice through surveys and administrative records; Organizes on-line and on-site training activities; Promotes international methodological standards; Development of research projects; Develops new methodologies and tools for analyzing and measuring phenomena related to conventional and emerging crime (organized crime), public safety, victimization, justice and government; Contributes to the development and implementation of the International Crime Classification for statistical purposes (ICCS); and actively promotes the development and improvement of institutional capacities regarding Victimization Surveys (VS) in Latin America.
- Founded in February 2019, the [UNODC-KOSTAT Centre of Excellence](#) is a regional hub providing a range of technical support to Asia-Pacific Member States to enhance regional capacity in the approaches to collecting criminal justice data.
