REGIONAL TRAINING ON MEASURING SDG16 IN AFRICA PEACE, JUSTICE AND STRONG INSTITUTIONS

WEBINAR 4: GROUP ACTIVITY & DISCUSSION

MODERATES: LUISA SÁNCHEZ-IRIARTE RESEARCHER ON CRIME & JUSTICE UNODC-INEGI CENTER OF EXCELLENCE IN MEXICO
GROUP ACTIVITY: 20 MINUTES

Instructions

OBJECTIVE: Discuss issues related to the production of SDG 16 indicators, specifically those related to Corruption

1. You will be taken automatically to break-out rooms for a period of 8 minutes (5-6 participants per group). Tip: take a picture of this slide as a reference!
2. Introduce yourselves by sharing your name, institution and country. Use your camera!
3. Define a group rapporteur: writing down the group ideas in a Word doc or note pad.
4. Discuss the question among yourselves - rapporteur to summarize the main ideas of the group. You will be brought back automatically to plenary, so make the best out of it!
5. We warmly welcome you to share your thoughts in the chat or by requesting the floor.

Q. Starting in January 2021, which concrete steps would you take to conduct a survey on corruption in your country or region?
Q. Starting in January 2021, which concrete steps would you take to conduct a survey on corruption in your country or region?

A. Steps for planning a survey

B. Steps for implementing a survey
A. Steps for planning a corruption survey:

1. Build the case to measure corruption at country level

2. Ensure ownership and quality of the survey

3. Build a corruption survey budget

</tbody>
</table>

**1. Specify data needs**
- Determine information needs through consultation (National Advisory / Technical committee)
- Establish the output objectives and develop the conceptual framework
- Verify other data sources

**2. Design**
- Design statistical products, variable description and data collection methodology
- Define frame and sample methodology
- Plan processing and analysis
- Design workflow

**3. Construction**
- Build and test data collection instrument
- Adjust or improve data collection instrument
- Test and finalize process and workflows

**4. Collect and capture data**
- Develop framework and sample, support materials and training strategies
- Set up and carry out collection

**5. Process**
- Integrate data
- Classify and code, review and validate, edit and impute
- Derive new variables and statistical units
- Calculate weights and aggregates
- Finalize data files

**6. Analyze**
- Prepare and validate draft outputs
- Scrutinize and explain results
- Apply disclosure control and finalize products

**7. Disseminate**
- Produce dissemination products and release them
- Update dissemination systems
- Promote dissemination products and support users

**8. Archive**
- Define archive rules
- Manage archive repository and preserve data and associated metadata
- Dispose of data and associated metadata

**9. Evaluate**
- Gather evaluation inputs
- Conduct evaluation
- Agree an action plan
