# Join the Active Citizen Hackathon!

## Thailand Data Innovation Awards 2019

Get ready to have 48 hours of fun, coding, and thinking to build innovative apps and support the society you live in!

The United Nations Office on Drugs and Crime (UNODC) Regional Office for Southeast-Asia and the Pacific, together with the Anti-Corruption Organization of Thailand (ACT), the Khon Thai Foundation, and Hand Social Enterprise are partnering this year with the Digital Government Agency to launch the very first anti-corruption hackathon in Thailand!

Register now

## Innovation & open data for anti-corruption: Why it matters

Around the world, pilot-tested apps are an effective way of **engaging a wide, diverse and active audience for transparency, public scrutiny and social impact**: think about innovative ideas and solutions to detect and prevent corruption!

We are looking for technology which can:

- Increase the transparency and positive impact of government spending
- Detect waste, inefficiency and conflict of interest in the national budget
- Prevent fraud and misuse of public funds
- Spread awareness of corruption within communities
- Engage the public in the fight against corruption

## Come prepared! What problem related to everyday corruption do you want to address?

- What are the typical situations of everyday corruption you want to address?
- What information could be used in an app to increase transparency, public scrutiny and social impact?
- How could data visualization help raise awareness on corruption and transparency in your country or community?

Join the hackathon and benefit from the guidance of experts and mentors! You will be able to promote transparent information and methods to bring social impact in Thailand, in an **impact-oriented, sustainable and innovative matter!**

## How do I know if I can join?

Students, developers, designers, young innovators, start-ups, entrepreneurs, data analysts, data scientist: **no matter your background, everyone is welcome to join**, and women are especially encouraged to participate.

## The Hack Days

### DAY 1

- Introduction, rules & policies
- Receive coaching by domain experts: stay tuned!

Wireframes techniques	Creating rapid prototype	Neural networks and deep learning	AI/ML	Technic pitching
-----------------------	--------------------------	-----------------------------------	-------	------------------

### DAY 2-3

- HackAway, 48 hours of fun, coding and thinking!

**July-Aug. 2019:** Award ceremony, stay tuned!

## Prizes

**The winning team will receive exciting prizes!**

- A Trophy
- Invitation to a global conference
- Mentoring by experts
- Chances to pitch to top executives
