

# German Development Cooperation's support to Anti-corruption reforms

*Mr. Johannes Ferguson, Head of Anti-Corruption and Integrity  
Programme (Deutsche Gesellschaft für Internationale  
Zusammenarbeit, GIZ )*

Conference of the States Parties to the United Nations  
Convention against Corruption

Sixth session, 2-6 November 2015, St. Petersburg,  
Russia

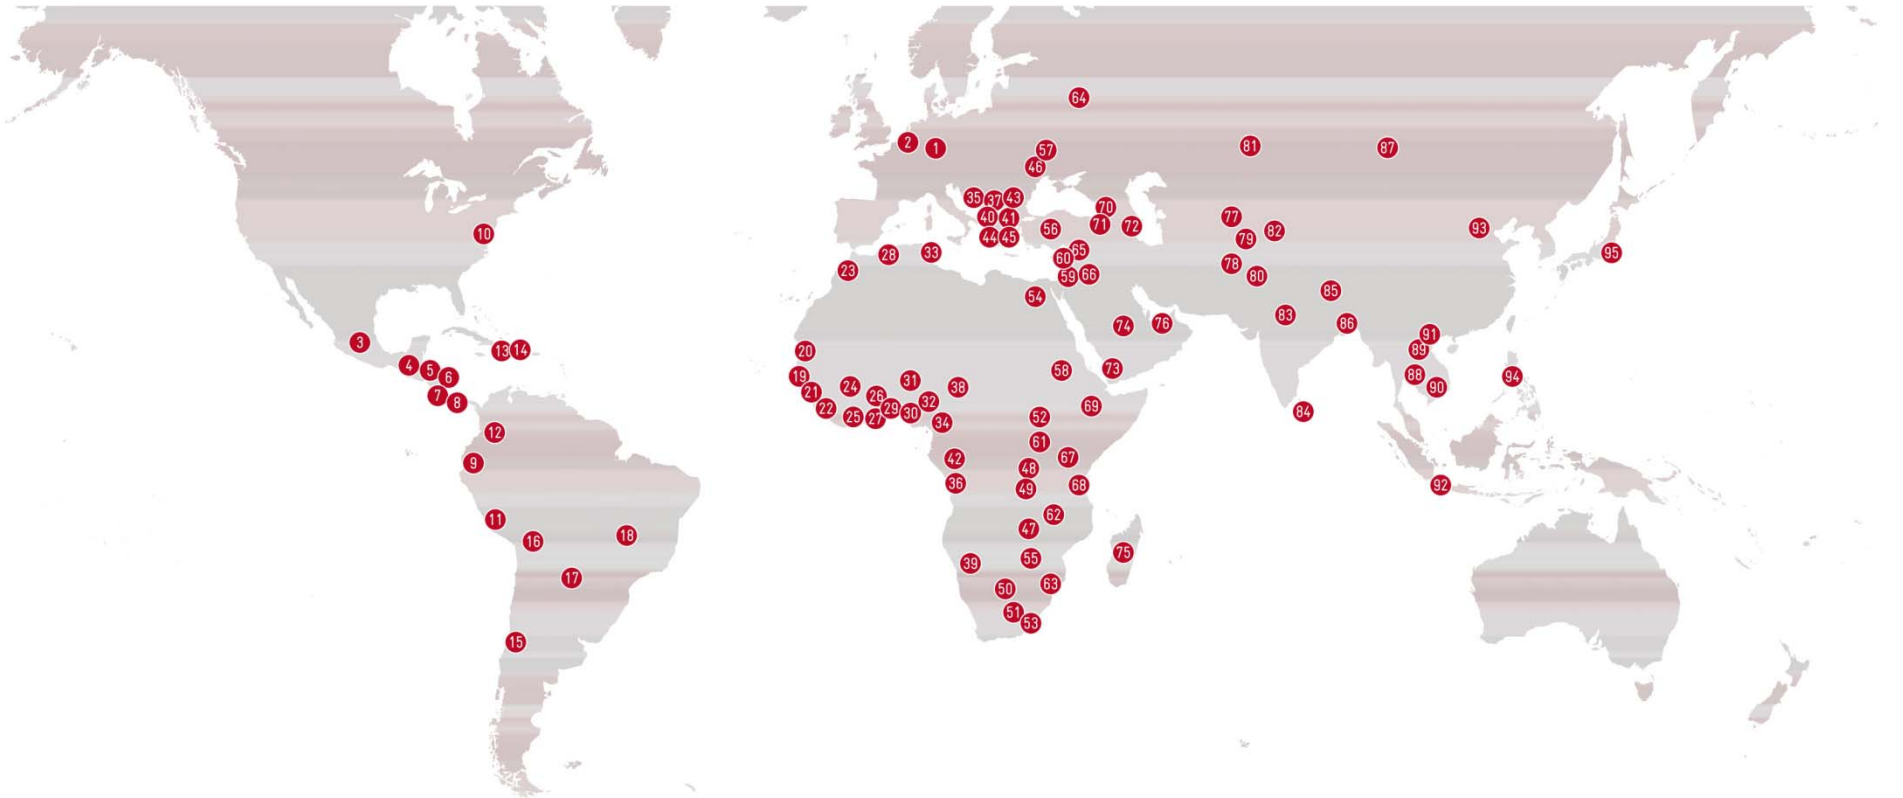

## Content

- Who we are
- How we support AC
- Examples of our work

## GIZ around the globe

# German Development Cooperation: Three Levels of Anticorruption Work

## Level 1: Internal compliance and integrity management

How do we protect development funds and the reputation of our development cooperation?

⇒ *Integrity management, rules and procedures (for procurement ,etc., O+R), trainings*

## Level 2: Technical cooperation with partners

How do we support our partners in preventing and combating corruption?  
Supporting national institutions from government, private sector and civil society

⇒ *Capacity Development, advisory services*

## Level 3: International / global cooperation

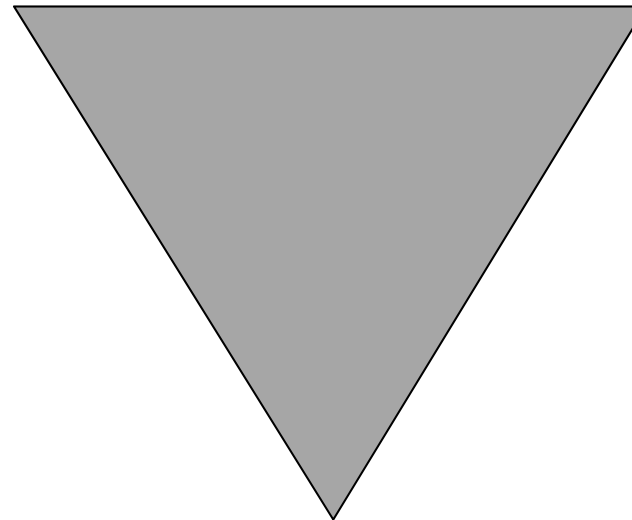

Strengthening debate and cooperation at the international level (OECD-DAC Govnet, U4), and political guidance (G8, UNCAC)

⇒ *Transnational dimension of corruption and anticorruption*

## Tackling corruption through Technical Cooperation

**Support to AC  
reforms**

**Broader  
Governance  
reforms**

**Sectoral reforms**

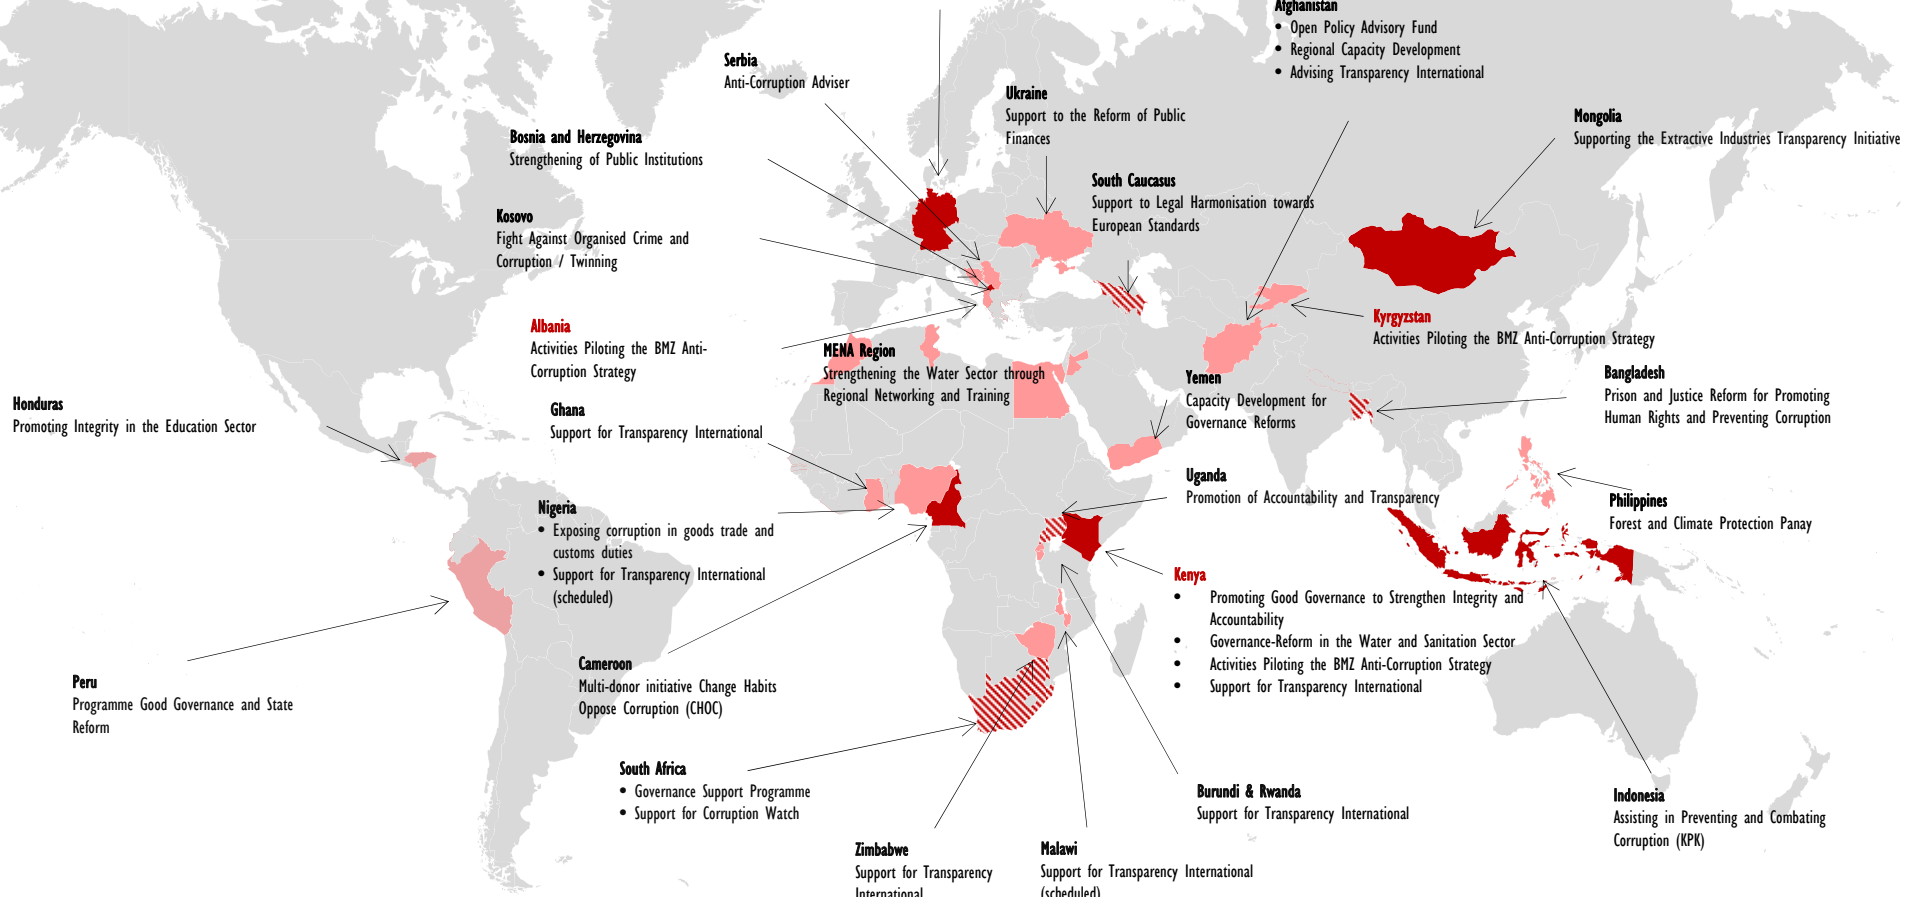

## Holistic anti-corruption support

- **Multi-stakeholder**
  - Network and dialogue platforms with the private sector and civil society organizations
  - Advice to Ministries
  - Organizational and strategic support to Anticorruption Commissions, Supreme Audit Institutions, Public Prosecutors Offices, Courts and Court administrations
- **Multi- level**
  - Projects with line ministries and subordinate bodies, municipalities and regions, parastatal entities
- **Multi-sectoral**
  - Strengthening administrative integrity, improving judicial integrity
  - Supporting investigative and prosecuting capacities
  - Corruption assessments and prevention in sectors (health, education, water...)

# GIZ Portfolio Anti-Corruption and Integrity (August 2015)

- Germany**  
Global Programmes:
- Anti-Corruption and Integrity
  - Extractive Industries Transparency Initiative (EITI)
  - Forest Governance Alliance for Integrity (AFIN)

 Projects with Anti-Corruption as main objective

 Projects with Anti-Corruption as secondary objective

 Projects with Anti-Corruption-Activities

## Strengthening Integrity and Accountability GIZ Promotion Programme of Good Governance

- Multi-stakeholder support along the „anti-corruption chain“: prevention, tracing and sanctioning in public service.
- Multi-level approach from national government down to (local) county level

### For example through:

Strengthening of anti-corruption commission, public prosecutors office, courts to improve legal sanctions

Increase in the number of new corruption cases filed from 2012 to 2013:  
16,648

Thank you!

## The four dimensions of anti-corruption work

- **Transparency**

Information is power. Power can be abused. Access to information can reduce the odds of abuse of power.

- **Voice & Participation**

Platforms and interfaces, e.g. between administration and citizens, must be *accessible*.

- **Accountability**

Participation and transparency are important preconditions for accountability. But corrupt behaviour also has to be punished.

- **Integrity Infrastructure**

An integrity infrastructure is a set of measures and instruments applied within an organization to manage corruption risks.
