253. A procuring entity shall procure consultancy services using the methods prescribed under regulations 254, 255, 256 and 257, respectively.

Public Procurement

GN. No. 446 (contd.)

International
competitive
selection

254.-(1) In international competitive selection, a procuring entity shall invite consultants regardless of their nationality, by means of an expression of interest notice that shall be advertised nationally and internationally, to submit expression of interest for consultancy services.

(2) The international competitive selection shall be used if-

- (a) payment may be made in whole or in part in foreign currency;
- (b) it is desired to attract expression of interest from the widest range of consultants regardless of the estimated value of the services to be procured.

(3) Under the international competitive selection, the procuring entity shall advertise, in the Journal and Tender Portal, the request for expression of interest in the form of the specific procurement notice for any particular contract and in accordance with the First Schedule to these Regulations.

National
competitive
Selection

255.-(1) In national competitive selection, a procuring entity shall invite consultants to submit expression of interest for the required services regardless of their nationality, by means of an expression of interest notice advertised in the Journal and Tender Portal in accordance with the First Schedule to these Regulations in the United Republic only.

(2) The national competitive selection may be used if-

- (a) payment may be made wholly in Tanzanian shillings;
- (b) the services can be obtained locally at prices below the international market;
- (c) the estimated cost of the services does not exceed the threshold for national competitive selection specified in the Eleventh Schedule to these Regulations; or
- (d) the advantages of international competitive selection are clearly outweighed by the administrative or financial burden involved.

Public Procurement

GN. No. 446 (contd.)

Restricted
competitive
selection

256.-(1) A procuring entity may restrict the issue of request for proposal to a limited number of specified consultants if-

- (a) such consultants are pre-qualified pursuant to regulation 286;
- (b) the services required are within the competence of a limited number of specialised consultants; or
- (c) there is an urgent need for the services such that there would be insufficient time for a procuring entity to engage in open national or international tendering, and that the circumstances giving rise to the urgency could not have been foreseen by a procuring entity and have not been caused by dilatory conduct on its part.

(2) The justification for restricting selection under sub-regulation (1) shall be prescribed in the record of selection proceedings made pursuant to regulation 15.

(3) Except where consultants are pre-qualified, a procuring entity using a restricted competitive selection shall seek proposals from a broad list of potential consultants to ensure competitive prices.

(4) In all respects other than advertisement and issue of the request for proposal, the procedures for competitive selection as set out in these Regulations shall apply.

Single source
selection

257.-(1) The use for single-source selection method shall be examined in the context of the overall interests of a procuring entity and the project, and a tender board's responsibility to ensure economy and efficiency and provide opportunity to all consultants to the extent possible.

(2) Single-source selection may be appropriate only if it presents a clear advantage over competition in which case single source selection may be justified-

- (a) for tasks that represent a natural continuation of previous work carried out by the firm; or
- (b) where a rapid selection is essential such as in an emergency operation; or

Public Procurement

GN. No. 446 (contd.)

(c) where only one firm is qualified or has experience of exceptional worth for the assignment.

(3) When continuity for downstream work is essential, the initial request for proposals shall outline this prospect and, if practical, the factors used for the selection of the consultant shall take into account the likelihood of continuity for downstream work.

(4) Continuity in the technical approach, experience acquired, and continued professional liability of the same consultant may make continuation with the initial consultant preferable to a new competition subject to satisfactory performance in the initial assignment and for such downstream assignments, the procuring entity shall request the initially selected consultant to prepare technical and financial proposals on the basis of terms of reference furnished by the procuring entity which shall then be negotiated.

(5) If the initial assignment is not awarded on a competitive basis or is awarded under tied financing or reserved selection or, if the downstream assignment is substantially larger in value, a competitive process acceptable to the tender board shall normally be followed, in which case, the consultant carrying out the initial work is not excluded from consideration if he expresses interest and the tender board shall consider exceptions to this rule only under special circumstances and only when a new competitive process is not practicable.

(b) Selection methods, procedures and conditions for application

Selection
methods and
procedures

258.-(1) The selection method, procedure and evaluation criteria to be adopted, for all complex assignments, shall be determined by the procuring entity in consultation with the relevant regulatory body prior to the invitation of consultants to submit proposals.

Public Procurement

GN. No. 446 (contd.)

(2) The criteria referred to in sub regulation (1), shall be considered by the tender board which will verify their suitability and make possible comments concerning them, and be included in the request for proposals.

(3) The following principal selection methods shall be applied according to the characteristics of the services required:

- (a) selection based solely on technical quality;
- (b) selection based on technical quality with price consideration;
- (c) selection based on the compatibility of technical proposal and least cost consideration; and
- (d) selection based on quality and fixed budget.

(4) The adoption of any of the four principal selection methods shall depend on the complexity of the assignment, the impact of the assignment on the resulting end product and the probability that the proposals will lead to comparable outputs.

(5) The Authority shall issue guidelines on selection methods.

Selection based solely on technical quality

259.-(1) In the selection procedure based solely on technical quality, the firm which has submitted the best technically acceptable proposal shall be the first to be invited for negotiations in accordance with regulation 308.

(2) The envelope containing the financial proposal shall be opened in the firm's presence and its contents examined and where no agreement is reached, then the consultant whose technical proposal is ranked the second shall be invited for negotiations.

(3) The exercise may continue until an agreement is reached with one of the firms whose technical proposal is considered satisfactory and retained.

(4) The financial envelopes containing the proposals of firms not invited for negotiations will be returned unopened to the firms.

(5) Quality based selection is appropriate for the

following types of assignments:

- (a) complex or highly specialized assignments for which it is difficult to define precise terms of reference and the required input from the consultants, and for which the client expects the consultants to demonstrate innovation in their proposals;
- (b) assignments that have a high downstream impact and in which the objective is to have the best experts such as feasibility and structural engineering design of such major infrastructure as large dams, policy studies of national significance, management studies of large government agencies;
- (c) assignments that can be carried out in substantially different ways, such as management advice and sector and policy studies in which the value of the services depends on the quality of the analysis; and
- (d) architectural services.

(6) Subject to sub-regulation (5) (d), novel and complex architectural services may be obtained through architectural competition in accordance with architectural procedures prescribed by the relevant professional regulatory body subject to the approval by the Authority.

(7) A firm is eligible to participate in architectural competition pursuant to sub-regulation (6) if it is registered or capable of being registered with the relevant professional body.

(8) In quality based selection, the request for proposals may request submission of a technical proposal only or request for submission of both technical and financial proposals at the same time, but in separate envelopes and the request for proposals shall not provide the estimated budget.

(9) If technical proposals alone were invited, after evaluating the technical proposals, the procuring entity shall ask the consultant with the highest ranked technical proposal

Public Procurement

GN. No. 446 (contd.)

to submit a detailed financial proposal so that the procuring entity and the consultant shall then negotiate the financial proposal and the contract.

(10) If consultants were requested to provide financial proposals initially together with the technical proposals, safeguards shall be built in to ensure that the price envelope of only the selected proposal is opened and the rest returned unopened, after the negotiations are successfully concluded.

Selection based on combined technical quality and price consideration

260.-(1) The selection procedure based on the technical quality with price consideration shall start with the evaluation of technical proposals.

(2) The technical proposals considered satisfactory and classified by order of merit shall have the corresponding financial proposals opened.

(3) After the necessary correction of arithmetic errors are made, a score of one-hundred percent shall be given to the lowest financial proposal and the score given to each of the other financial proposals is proportionately reduced.

(4) The technical and financial proposals shall be weighted as specified in the request for proposal and the combined value of the two proposals shall be calculated for each firm.

(5) Negotiations shall be initiated with the firm which has the highest combined score and shall be conducted in accordance with regulation 308, until an agreement is reached with one of the firms whose technical proposals are considered satisfactory and retained.

Selection based on compatibility of technical proposals and least cost consideration

261.-(1) The selection based on compatibility of technical proposals and least cost consideration may be used in the selection of consultants for assignments of a standard or routine nature where well established practices and standards exist, and in which the contract amount is small.

(2) The procedure starts with the evaluation of the technical proposal and firms whose technical proposals are retained shall be those who scored equal or above the

minimum specified threshold.

(3) At the stage of examination of financial proposals, only the envelopes containing the financial proposals of consultants who scored equal or above the minimum specified threshold shall be opened.

(4) The necessary arithmetic corrections will then be made for the purposes of comparison and the consultant whose financial offer is considered the lowest shall be invited for negotiations in accordance with regulation 308.

(5) Where an agreement is not reached, the consultant whose financial offer is ranked second lowest, shall in turn be invited to negotiate and so on until an agreement is reached with one of the best ranked consultants.

Selection based on quality and fixed budget

262.-(1) The selection based on quality and fixed budget method may be used when the assignment is simple and can be precisely defined and when the budget is fixed.

(2) The request for proposals shall indicate the available budget and request the consultants to provide their technical and financial proposals in separate envelopes, within the budget.

(3) Terms of reference shall be prepared to make sure that the budget is sufficient for the consultants to perform the expected tasks.

(4) Evaluation of all technical proposals shall be carried out first and the price envelopes of those scoring above the minimum threshold shall be opened in public.

(5) Proposals that exceed the indicated budget shall be rejected.

(6) The consultant who has submitted the highest ranked technical proposal among the rest shall be selected and invited to negotiate a contract in accordance with regulation 308.

Selection based on consultants qualification

263.-(1) The selection based on consultants qualification may be used for very simple assignments for which the need for preparing and evaluating competitive

265.-(1) United Nations agencies may be hired as consultants, where they are qualified to provide technical assistance and advice in their area of expertise.

(2) The United Nations agencies shall not receive any preferential treatment in a competitive selection process, except that a procuring entity may accept the privileges and immunities granted to United Nations agencies and their staff

Selection
of Non-
governmental
organizations

266.-(1) Non-governmental organisations may be included in the short list if they express interest and provided that a procuring entity and a respective tender board are satisfied with their qualifications and eligibility to participate.

(2) For assignments that emphasize participation and considerable local knowledge, the short list may comprise entirely non-governmental organisations and if so, the quality and cost based selection procedure shall be followed, and the evaluation criteria shall reflect the unique qualifications of non-governmental organisations, such as voluntarism, non-profit status, local knowledge, scale of operation, and reputation.

(3) Privileges and other advantages such as tax exemptions and other facilities, and special payment provisions shall be evaluated and neutralized in the cost comparison to ensure fair competition.

TYPES OF WORKS OR CONTRACTS

S/N	Key Items	Description
(1)	Lump sum contracts:	These are contracts for a fixed amount for the works as specified and tendered for. Such contracts may or may not be accompanied by a priced schedule but when such schedules are provided; their purpose is to assist in the evaluation of progress payments and for the pricing of variations as provided in the general conditions of contract. With a lump sum contract, the works shall not except in respect of variations be measured for the purpose of payment.
(2)	Schedule of rates contracts:	A schedule of rates contract is a contract for which tenderers submit rates for the estimated quantities as set out in a bill of quantities which forms part of the tendering documents and from which the lump sum price is derived from the aggregation of sums tendered based on these quantities and rates. Payment under a schedule of rates contract is determined by measurement of the actual quantities completed and at the rates as tendered.
(3)	Contracts with special features:	Contracts with special features including cost reimbursement type in which the contractor is paid the actual cost of the work plus a fee. This fee may be a fixed sum, a percentage of the costs or a fluctuating fee. Where cost reimbursement contracts are used, the contract is to be arranged whenever possible on the basis of "cost plus fixed fee" rather than "cost plus percentage".
(4)	Performance based contracts:	Contracts in which all aspects of acquisition are structured around the purpose of work to be performed, and include, to the maximum extent practicable, describing requirements in terms of results required rather than the methods of performance of the work, and the measurable performance standard. This type of contract places on the contractor the responsibility to perform most of the quality control functions traditionally performed by the
