Seizures of ATS (excluding “ecstasy”-type substances), 2012

Weight in ton equivalents*.

The present map includes data from countries and territories for which official seizure data are available and amount to more than 10 kg.

---

**Available data for 2011 were incomplete and therefore not comparable to 2012 data.

*** Includes seizures of 10,786 litres of methamphetamine.

Source: UNODC annual report questionnaire data, supplemented by other official sources.

Note: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Dashed lines represent undetermined boundaries. Dotted line represents approximately the Line of Control in Jammu and Kashmir agreed upon by India and Pakistan. The final status of Jammu and Kashmir has not yet been agreed upon by the parties.

The final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined.

* This quantity reflects the bulk weight of seizures of amphetamine-type stimulants (excluding “ecstasy”-type substances) and does not include non-specified ATS, prescription stimulants and other stimulants), such as adjustment for purity. Seizures of amphetamine, methamphetamine and non-specified ATS reported in tablets or similar units are converted using assumed bulk tablet weights between 1.5g and 2.5g (depending on the region and specific drug type) and based on information currently available to UNODC. The conversion factor for tablets is listed in the Methodology section of the World Drug Report. Seizures reported by volume are converted assuming 1 litre has a mass of 1 kg. The conversion factors are listed in the Methodology section of the World Drug Report.
