

# Main methamphetamine trafficking flows as described by reported seizures, 2018–2021

Sources: UNODC.

The size of the route is based on the total amount seized on that route, according to the information on trafficking routes provided by Member States in the annual report questionnaire, individual drug seizures and other official documents, over the 2018–2021 period. The routes are determined on the basis of reported country of departure/ transit and destination in these sources. As such, they need to be considered as broadly indicative of existing trafficking routes while several secondary routes may not be reflected. Route arrows represent the direction of trafficking: origins of the arrows indicate either the area of departure or the one of last provenance, end points of arrows indicate either the area of consumption or the one of next destination of trafficking. Therefore, the trafficking origin may not reflect the country in which the substance was produced. Please see the Methodology section of this document.

\* North America excluding Mexico.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
