about our innovative project:

## Integrated School Prevention & Peer Education Programme

A classroom-based character education and life skills program integrated with peer education in collaboration with the Emirates National School, an 8,000 student multicampus private school in UAE. The program aims to enhance life skills (inter and intrapersonal) and promote prosocial behaviour and norms using peer-to-peer education. The programme has extended over several academic years across four campuses representing different social and demographic characteristics.

This session presents the design of the program, the methods use in implementation, and key outputs and milestones, as well as the primary and secondary outcomes. The session will close with a discussion on the lessons learned and recommendations for generalizing the implementation.
