

Preventing and investigating the diversion of equipment used in the illicit manufacture of drugs

GUIDANCE FOR POLICY MAKERS

65TH CND SIDE EVENT

Equipment, in the context of article 13 of the 1988 Convention, is required for the illicit manufacture of most drugs. While article 13 provides a mandate and complementary tool for Governments to prevent trade in and diversion of such equipment and materials for illicit production or manufacture of drugs, it has not yet been implemented to its full potential. The event will present various options, good practices and approaches that selected Member States and other actors have taken to increase operational use of article 13 in addressing illicit drug manufacture. INCB will launch an awareness-raising and guidance document for policy makers.
