Seizures of "ecstasy"-type substances, 2011
The present map includes data from countries and territories for which official seizure* data are available and amount to more than 1 kgs.

* This quantity reflects the bulk weight of "ecstasy" seizures, with no adjustment for purity. Seizures of "ecstasy" reported in tablets or similar units are converted using assumed bulk tablet weights between 200mg and 300mg, depending on the region and based on information currently available to UNODC. The conversion factors are listed in methodology section of the Word Drug Report.

** Trend for Argentina based on partial data for 2010 and 2011.

Source: UNODC annual report questionnaire data, supplemented by other sources.

Note: The boundaries shown on this map do not imply official endorsement or acceptance by the United Nations. Dashed lines represent undetermined boundaries.
The dotted line represents approximately the Line of Control in Jammu and Kashmir agreed upon by India and Pakistan. The final status of Jammu and Kashmir has not yet been agreed upon by the parties. The final boundary between the Sudan and South Sudan has not yet been determined.
